

MATHEMATICS D (CALCULATOR VERSION)

Paper 4024/11

Paper 11

General comments

The presentation of the scripts was often good. It is important that candidates show working. As indicated in the instructions on the front page, this should be completed in blue or black pen. Some candidates completed their working in pencil, often erasing their solutions, making it impossible for Examiners to award marks for the intermediate steps. Others overwrote their pencil answers in pen (which gave a double image) making it very difficult for Examiners to read the work. At times, the amount of rubber debris left behind after candidates erased their working made the script less clear to read.

Candidates should take care when transcribing their answers from the working to the answer line. It is important that the decimal point is clear and placed above the dotted line given for the answer. If an answer is changed, it is far better to delete the wrong answer and re-write it rather than attempt to overwrite it.

A number of candidates misread their own writing, particularly 6 for 0.

There were a number of scripts where no attempt had been made at the later questions, most likely due to the difficulty of the topics rather than lack of time to complete the paper.

Comments on specific questions

Question 1

- (a) This part was answered well. The most common wrong answer was 8.3 and, on a few occasions, the decimal point was omitted.
- (b) This part was generally correctly answered with the most common mistake being the misplacing of the decimal point.

Answers: (a) 7.7 (b) 0.039

Question 2

- (a) This part was well answered. A few candidates converted $\frac{16}{21}$ to $1\frac{5}{21}$ or gave an answer of $\frac{4}{10}$.
- (b) Candidates were aware that a fraction had to be inverted but occasionally it was the first rather than the second which was changed leading to an answer of $\frac{4}{3}$.

Answers: (a) $\frac{16}{21}$ (b) $\frac{3}{4}$
