grounded theoretical model of the Mind Without it practical treatment of the disorders remains wandering in the dark How can we fix something if there is no understanding of what it is and how it works Within the Teleological Transduction Theory developed in the previous volumes of the series harmony of the Mind is a physical concept of normal functioning Respectively when the pathologies are described as dissonances it is not a metaphor but a reference to the physical malfunction leading to the disintegration of the Mind The book proposes a new approach to the diagnosis and classification of mental pathologies based on an assessment of the state of the physical mechanism of the Mind and violations of the technological algorithm of the brain The goal is to create the concept as a universal tool that can be used in various pathologies The book offers a model of systemic pathologies such as autism and schizophrenia which reveals the essence of the physical problem that causes the observed symptoms This could be the beginning of a project that will overcome the current chaotic state of the field of psychopathology and harmonize our diagnosis and treatment of mental illness as disorders of the brain Hong Kong's Growth Synchronization with China and the U.S. Mr.Dong He,Wei Liao,Tommy Wu,2017-07-08 This paper investigates the synchronization of Hong Kong SAR s economic growth with mainland China and the United States This paper identifies trends of economic growth based on the permanent income hypothesis Specifically the paper confirms whether real consumption in Hong Kong SAR and mainland China satisfy the permanent income hypothesis at least in a weak form It then identifies the permanent and transitory components of income of each economy using a simple state space model It uses structural vector autoregression models to analyze how permanent and transitory shocks originating from mainland China and the United States affect the Hong Kong economy and how such influences evolve over time The paper s main findings suggest that transitory shocks from the United States remain a major driving force behind Hong Kong SAR s business cycle fluctuations On the other hand permanent shocks from mainland China have a larger impact on Hong Kong SAR s trend growth *Frontier Computing* Jia-Wei Chang,Neil Yen,Jason C.
