S Ashworth

T100 Horizon Operating Manual:

Infinite Horizon Optimal Control Dean A. Carlson, Alain Haurie, 2013-06-29 This monograph deals with various classes of deterministic continuous time optimal control problems which are defined over unbounded time intervals. For these problems the performance criterion is described by an improper integral and it is possible that when evaluated at a given admissible element this criterion is unbounded. To cope with this divergence new optimality concepts referred to here as overtaking weakly overtaking agreeable plans etc have been proposed. The motivation for studying these problems arises primarily from the economic and biological sciences where models of this nature arise quite naturally since no natural bound can be placed on the time horizon when one considers the evolution of the state of a given economy or species. The responsibility for the introduction of this interesting class of problems rests with the economist who first studied them in the modeling of capital accumulation processes. Perhaps the earliest of these was F. Ramsey who in his seminal work on a theory of saving in 1928 considered a dynamic optimization model defined on an infinite time horizon. Briefly this problem can be described as a Lagrange problem with unbounded time interval. The advent of modern control theory particularly the formulation of the famous Maximum Principle of Pontryagin has had a considerable impact on the treatment of these models as well as optimization theory in general. *The Detour*, 1984. The Evolution of Yield Management in the Airline Industry

Ben Vinod, 2021-05-28 This book chronicles airline revenue management from its early origins to the last frontier. Since its inception revenue management has now become an integral part of the airline business process for competitive advantage. The field has progressed from inventory control of the base fare to managing bundles of base fare and air ancillaries to the precise inventory control at the individual seat level. The author provides an end to end view of pricing and revenue management in the airline industry covering airline pricing advances in revenue management availability and air shopping offer management and product distribution agency revenue management impact of revenue management across airline planning and operations and emerging technologies in travel. The target audience of this book is practitioners who want to understand the basics and have an end to end view of revenue management. Traite de l'exploitation des mines de houille: ou, Exposition comparative des methodes employees en Belgique, en France, en Allemagne A. T. Ponson, 1854

Genetic Programming Theory and Practice XXI Stephan M. Winkler, Wolfgang Banzhaf, Ting Hu, Alexander Lalejini, 2025-02-27 This book brings together some of the most impactful researchers in the field of genetic programming. Each one working on unique and interesting intersections of theoretical development and practical applications of this evolutionary based machine learning paradigm. Topics of particular interest for this year's book include powerful modeling techniques through GP based symbolic regression novel selection mechanisms that help guide the evolutionary process modular approaches to GP and applications in cybersecurity biomedicine and program synthesis as well as papers by practitioners of GP that focus on usability and real world results. In summary readers will get a glimpse of the current state of

the art in GP research **Proceedings of the International Field Exploration and Development Conference 2023**

Jia'en Lin, 2024-03-18 This book focuses on reservoir surveillance and management reservoir evaluation and dynamic description reservoir production stimulation and EOR ultra tight reservoir unconventional oil and gas resources technology oil and gas well production testing and geomechanics This book is a compilation of selected papers from the 13th International Field Exploration and Development Conference IFEDC 2023 The conference not only provides a platform to exchanges experience but also promotes the development of scientific research in oil gas exploration and production The main audience for the work includes reservoir engineer geological engineer enterprise managers senior engineers as well as students The Barrier Zones in the Ocean , 2005-07-06

Geochemical barrier zones play an important role in determining various physical systems and characteristics of the oceans e g hydrodynamics salinity temperature and light In this book each of the 40 barrier zones covered are illustrated and defined by physical chemical parameters Among the topics discussed are the processes of inflow transformation and precipitation of the sedimentary layer of the open oceans and more restricted areas such as the Baltic Black and Mediterranean Seas This well illustrated book may serve as the basis for courses such as Marine Geochemistry or Ocean Usage and can be useful to researchers in the fields of geology geography marine chemistry geoecology and hydrochemistry

National Theatre Connections 2014 Sabrina Mahfouz, Simon Vinnicombe, Catherine Johnson, Pauline McLynn, Dafydd James, Luke Norris, Sam Holcroft, Matt Hartley, Deborah Bruce, Evan Placey, 2014-05-08 Drawing together the work of ten leading playwrights a mixture of established and emerging writers this National Theatre Connections anthology is published to coincide with the 2014 festival which takes place across the UK and finishes up at the National Theatre in London It offers young performers between the ages of thirteen and nineteen everywhere an engaging selection of plays to perform read or study Each play is specifically commissioned by the National Theatre s literary department with the young performer in mind The plays are performed by approximately 200 schools and youth theatre companies across the UK and Ireland in partnership with multiple professional regional theatres where the works are showcased As with previous anthologies the volume will feature an introduction by Anthony Banks Associate Director of the National Theatre Discover Programme and each play includes notes from the writer and director addressing the themes and ideas behind the play as well as production notes and exercises The National Theatre Connections series has been running for nineteen years and the anthology that accompanies it published for the last three years by Methuen Drama is gaining a greater profile by the year Some iconic plays have grown out of the Connections programme including Citizenship by Mark Ravenhill Burn by Deborah Gearing Chatroom by Enda Walsh Baby Girl by Roy Williams DNA by Dennis Kelly and The Miracle by Lin Coghlan The series has a recognisable brand and the anthologies continue to be an extremely useful resource their value extending well beyond their year of publication This year s anthology includes plays by Sabrina Mahfouz Simon Vinnicombe Catherine Johnson Pauline McLynn Dafydd James Luke Norris and Sam Holcroft Integrated Assessment of

Climate Change Impacts and Urban Resilience Beniamino Russo, Eduardo Martínez-Gomariz, 2021-03-09 This book brings together recent research related to urban resilience in particular taking into account climate change impacts and hydrological hazards Due to the complexity of our cities which are vulnerable and continuously evolving systems urban resilience should be considered as a transversal and multi sectorial issue affecting different urban services several hazards and all the steps of the risk management cycle Within this context the different pieces of research that form this book deal with the topics of multi risk and urban resilience assessment analysis of cascading effects and the proposal and prioritization of adaptation measures and strategies to cope with climate related hazards through multi criteria analysis

Investigating and harnessing T-cell functions with engineered immune receptors and their ligands Bruno Laugel, 2015-01-22 T cells are an essential component of the immune system that provide protection against pathogen infections and cancer and are involved in the aetiology of numerous autoimmune and autoinflammatory pathologies Their importance in disease the relative ease to isolate expand and manipulate them ex vivo have put T cells at the forefront of basic and translational research in immunology Decades of study have shed some light on the unique way T cells integrate extrinsic environmental cues influencing an activation program triggered by interactions between peptide MHC complexes and the antigen recognition machinery constituted of clonally distributed T cell receptors and their co receptor CD4 or CD8 The manipulation of these molecular determinants in cellular systems or as recombinant proteins has considerably enhanced our ability to understand antigen specific T cell activation to monitor ongoing T cell responses and to exploit T cells for therapy Even though these principles have given numerous insights in the biology of CD8 T cells that translate into promising therapeutic prospects as illustrated by recent breakthroughs in cancer therapy they have proven more challenging to apply to CD4 T cells This Research Topic aims to provide a comprehensive view of the recent insights provided by the use of engineered antigen receptors and their ligands on T cell activation and how they have been or could be harnessed to design efficient immunotherapies

Basic Concepts of Data Mining Monelli Ayyavaraiah, 2017-01-01 The field of data mining has seen rapid strides over the past two decades especially from the perspective of the computer science community While data analysis has been studied extensively in the conventional field of probability and statistics data mining is a term coined by the computer science oriented community For computer scientists issues such as scalability usability and computational implementation are extremely important The emergence of data science as a discipline requires the development of a book that goes beyond the traditional focus of books on only the fundamental data mining courses Recent years have seen the emergence of the job description of data scientists who try to glean knowledge from vast amounts of data In typical applications the data types are so heterogeneous and diverse that the fundamental methods discussed for a multidimensional data type may not be effective Therefore more emphasis needs to be placed on the different data types and the applications which arise in the context of these different data types A comprehensive data mining book must explore the different aspects of data mining starting from

the fundamentals and then explore the complex data types and their relationships with the fundamental techniques While fundamental techniques form an excellent basis for the further study of data mining they do not provide a complete picture of the true complexity of data analysis This book studies these advanced topics without compromising the presentation of fundamental methods Therefore this book may be used for both introductory and advanced data mining courses Until now no single book has addressed all these topics in a comprehensive and integrated way **Merchant Vessels of the United**
