*Order and Chance* Geoffrey Bremner, 1983-09-08 This study discovers a pattern to Diderot's thinking a fundamental dualism attributable largely to the attitudes and assumptions of the time and giving a common structure to his ideas and

writing Geoffrey Bremner draws widely on Diderot's works in studying his ideas on perception and action aesthetics ethics and politics as well as his plays and fiction The subtlety of the textual analysis and the analogies Dr Bremner draws provide a convincing and illuminating argument for his interpretation He supports this but emphasising the intellectual circumstances in which Diderot wrote and demonstrating his links to other eighteenth and seventeenth century writers His study will therefore make a valuable contribution to the reassessment of the period that is currently underway as well as to the central elusive problem presented by Diderot's thought itself

The concept of la chance accounts for everyday knowledge production in uncertain contexts in Bamako Mali where university graduates constitute an educational elite strongest affected by unemployment Graduates know that la chance decides whether they succeed or fail Susann Ludwig shows that this concept embodies common sense as much as it offers the possibility of the extraordinary Graduates play the game of la chance in which success is defined by a continuation of play rather than an end goal Providing an explorative experience to the reader this study accounts for the elusiveness of la chance in the Bamako context and beyond
