Occult Investigator tackles more bizarre challenges including a computer cursed by black magick a vampire teen who has a blood sucking psychic link with his spitting image cousin the werewolf of Van Nuys California killer cats Satanic neighbors in a Manhattan apartment and our favorite a sexually crazed succubus housewife who blames demons for her insatiable cravings

Death's Doorway Crin Claxton, 2015-06-15 Death's door is open as far as supernatural detective Tony Carson is concerned and ghosts are flooding through it Tony's got her hands full but she's obsessed with why the prisoner from Holloway can't rest Luckily her trusty drag queen spirit guide is always ready with advice and insults Tony's girlfriend Maya is worried that the hot new acupuncturist at her clinic is driving their best friend Jade crazy and not in a good way Maya's determination to find out why puts all their lives on the line Somewhere beneath the lies voices and delusions is the truth But can Tony Maya and Jade come together in the final race to stay in the land of the living

It's Called Murder, Brenda. Look It up! Dakota Cassidy, 2025-08-05 Welcome to my worst effin nightmare The Accidental Detective Agency I'm Nina Statleon a vampire with a little bit of witch thrown in for good measure a sucky magicless one if anyone asks for those interested My best friends Marty a werewolf and Wanda a halvesie have talked me into opening a detective agency for paranormals Let me be real clear I do not want to be a detective and I think this idea is bananas Now the dungeon in my castle in Long Island is our new office I call the murder basement filled with watercolor landscapes throw rugs and uncomfortable furniture all in the name of making our clients comfortable That said my partners in this new adventure don't care about all my protests That's how we end up with our first client Brenda Bronkowski an older vampire the human police are hunting down for murder Brenda fell for one of the oldest tricks in this new age of technology's book a romance scam Lonely and sad with only her pets for companionship Brenda hooked up with a human a much younger one You guessed it Brenda was catfished Now that much younger human Owen Barker is dead leaving behind a wife and two kids Brenda swears she's never even met him let alone murdered him and she's come to us for help finding the person responsible for his murder Not only is the suspect list low like we only have two there's a glitch and it's a big one The clan They don't like it when a vampire's been accused of murdering a human They take you out ask questions later Brenda's technically a fugitive we're harboring while we investigate It's bad enough the human police like her for Owen's murder but if the clan finds out we've got her holed up in the murder basement it won't only be curtains for Brenda our little private investigating gig could be over before it's really begun Which wouldn't exactly be the end of the world for me but my over-achieving BFFs would never let me hear the end of it That means we need to solve this pronto so we can get the clan off our backs but more importantly so Brenda doesn't end up expunged

Supernatural Agents Ilkka Pyysiäinen, 2009-04-27 The cognitive science of religion is a rapidly growing field whose practitioners apply insights from advances in cognitive science in order to provide a better understanding of religious impulses beliefs and behaviors In this book Ilkka Pyysiäinen shows how this methodology can profitably be used in the comparative study of beliefs about superhuman agents He begins by developing a theoretical outline of the basic modular

architecture of the human mind and especially the human capacity to understand agency He then goes on to discuss examples of supernatural agency in detail arguing that the human ability to attribute beliefs and desires to others forms the basis of conceptions of supernatural agents and of such social cognition in which supernatural agents are postulated as interested parties in social life Beliefs about supernatural agency are natural says Pyysiainen in the sense that such concepts are used in an intuitive and automatic fashion Two dots and a straight line below them automatically trigger the idea of a face for example Given that the mind consists of a host of such modular mechanisms certain kinds of beliefs will always have a selective advantage over others Abstract theological concepts are usually elaborate versions of such simpler and more contagious folk conceptions Pyysiainen uses ethnographical and survey materials as well as doctrinal treatises to show that there are certain recurrent patterns in beliefs about supernatural agents both at the level of folk religion and of formal theology

Game Over Theophilus Monroe,2024-10-31 If you die in the game You die for real Sebastian Winter doesn't play games He doesn't even know what RPG stands for Players are dying in their VR headsets The attacks eerily similar to how their avatars died in the game The killer isn't some gamer with a real world vendetta It's happening all over the world Who unleashed a demon in virtual reality If the demon kills your avatar and you die for real what happens if the demon learns how to possess people in the game If Sebastian is going to stop the demon he has to play the game It's an open world digital universe The demon could be anywhere How will Sebastian track it down In this game there are no respawns This time game over means game over for good *Game Over* is the third book in the Sebastian Winter series He's not your run of the mill hunter or slayer He doesn't hunt down monsters because of what they are He only takes out the guilty But not all hunters see things the same way A decade ago a monster abducted Sebastian's wife on their honeymoon He's been hunting monsters ever since looking for answers hoping to find her But nothing he's killed yet looks like the beast he faced that night Not every monster he hunts down has information but if he can save a life spare one person from the pain he's endured over the last ten years it's worth it And he won't stop until he has answers Until Angie is back in his arms Ready Player One meets Supernatural

Supernatural Selection Matt Rossano, 2010-05-28 In 2006 scientist Richard Dawkins published a blockbuster bestseller *The God Delusion* This atheist manifesto sparked a furious reaction from believers who have responded with numerous books of their own By pitting science against religion however this debate overlooks what science can tell us about religion According to evolutionary psychologist Matt J Rossano what science reveals is that religion made us human In *Supernatural Selection* Rossano presents an evolutionary history of religion Neither an apologist for religion nor a religion basher he draws together evidence from a wide range of disciplines to show the valuable even essential adaptive purpose served by systematic belief in the supernatural The roots of religion stretch as far back as half a million years when our ancestors developed the motor control to engage in social rituals that is to sing and dance together Then about 70 000 years ago a global ecological crisis drove humanity to the edge of extinction It forced the survivors to create new strategies for survival and religious rituals were foremost among them Fundamentally Rossano writes religion is a way for humans to relate to each other and the world around them and in the grim struggles of prehistory it offered significant survival and reproductive advantages It emerged as our ancestors first health care system and a critical part of that health care system was social support Religious groups tended to be far more cohesive which gave them a competitive advantage over non religious groups and enabled them to conquer the globe Rather than focusing on one aspect of religion as many theorists do Rossano offers an all encompassing approach that is rich with surprises insights and provocative conclusions

The Roots of Religion Roger Trigg, Justin L. Barrett, 2016-02-24 The cognitive science of religion is a new discipline that looks at the roots of religious belief in the cognitive architecture of the human mind *The Roots of Religion* deals with the philosophical and theological implications of the cognitive science of religion which grounds

religious belief in human cognitive structures religious belief is natural in a way that even scientific thought is not Does this new discipline support religious belief undermine it or is it despite many claims perhaps eventually neutral This subject is of immense importance particularly given the rise of the new atheism Philosophers and theologians from North America UK and Australia explore the alleged conflict between truth claims and examine the roots of religion in human nature Is it less natural to be an atheist than to believe in God or gods On the other hand if we can explain theism psychologically have we explained it away Can it still claim any truth This book debates these and related issues **InqEnqIncEnc : The**
