The Pearson General Studies Manual 2009, 1/e Showick Thorpe Edgar Thorpe, 2009 This latest edition of The Pearson General Studies Manual continues to provide exhaustive study material for the General Studies paper of the UPSC Civil Services Preliminary Examination This student friendly book has been completely revised thoroughly updated and carefully streamlined and is strictly exam centric In this new edition a large number of new boxes and marginalia with additional and relevant information have been added to provide cutting edge information to the aspirant Readers will find that important facts and information have been presented in the form of well structured tables and lists

Mobile Intelligent Autonomous Systems Jitendra R. Raol, Ajith K. Gopal, 2016-04-19 Going beyond the traditional field of robotics to include other mobile vehicles this reference and recipe book describes important theoretical concepts techniques and applications that can be used to build truly mobile intelligent autonomous systems MIAS With the infusion of neural networks fuzzy logic and genetic algorithm paradigms for MIAS it blends modeling sensors control estimation optimization signal processing and heuristic methods in MIAS and robotics and includes examples and applications throughout Offering a comprehensive view of important topics it helps readers understand the subject from a system theoretic and practical point of view

Radio Receivers for Systems of Fixed and Mobile Communications Vasiliy V. Logvinov, Sergey M. Smolskiy, 2022-05-13 The textbook acquaints the reader with the architecture of receivers of analog and digital radio systems helps to study the stages of designing a modern radio receiver and reveals the reasons and methods for its effective operation in networks for various purposes Particular attention is paid to the methods of generating and processing signals in the receivers of digital systems with multiple access which make it possible to provide data transfer rates close to the maximum possible according to Shannon As a textbook for students studying methods of optimal signal reception the book will also be useful to specialists in the field of telecommunications involved in the development of radio receivers The book shows how the development of theoretical circuitry and integrated technologies led to the active introduction of algorithmic methods for signal processing changed both the design of receivers and the methods of forming the information flow in free space MIMO beamforming The creation of a global 5G network based on heterogeneous networks puts forward new requirements for the architecture of receivers which are determined by the requirements to achieve high data rates low time delays or use in networks with

coordinated multipoint transmission and reception CoMP To consolidate the knowledge gained the book includes a complete set of materials for online classes including questions and answers a guide to solving problems for each chapter and computer modeling units of receivers in the MicroCAP environment based on preliminary calculations **PC Mag**, 2001-01-02 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology **Monthly Catalogue, United States Public Documents**, 1994 **Nutrition and Management of Animals We Keep as Companions, Volume II** Anna Katharine Shoveller, 2024-01-11 Plunkett's E-commerce & Internet Business Almanac 2006 Plunkett Research Ltd, 2006-02 A ready reference guide to the E Commerce Internet Business Complete profiles of over 400 of the largest most successful corporations in all facets of the Internet sector Our industry analysis covers B2C B2B online financial services online travel and Internet access and usage trends **InfoWorld**, 1983-01-31 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects Network World, 2003-09-15 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce **MotorBoating**, 1990-01 **Scientific and Technical Aerospace Reports**, 1995 **InfoWorld**, 1994-01-10 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **From soil to seed: micronutrient movement into and within the plant** Raul Antonio Sperotto, Felipe Klein Ricachenevsky, Lorraine Elizabeth Williams, Marta Wilton Vasconcelos, Paloma Koprovski Menguer, 2014-11-19 In all living organisms essential micronutrients are cofactors of many ubiquitous proteins that participate in crucial metabolic pathways but can also be toxic when present in excessive concentrations In order to achieve correct homeostasis plants need to control uptake of metals from the environment their distribution to organs and tissues and their subcellular compartmentalization They also have to avoid deleterious accumulation of metals and metalloids such as Cd As and Al These multiple steps are controlled by their transport across various membrane structures and their storage in different organelles Thus integration of these transport systems required for micronutrient trafficking within the plant is necessary for physiological processes to work efficiently To cope with the variable availability of micronutrients plants have evolved an intricate collection of physiological and developmental processes which are under tight control of short and long range signaling pathways Understanding how plants perceive and deal with different micronutrient concentrations from regulation to active transport is important to completing the puzzle of plant metal homeostasis This is an essential area of research with several implications for plant biology agriculture and

human nutrition There is a rising interest in developing plants that efficiently mobilize specific metals and prosper in soils with limited micronutrient availability as well as those that can selectively accumulate beneficial micronutrients in the edible parts while avoiding contaminants such as Cd and As However there is still an important gap in our understanding of how nutrients reach the seeds and the relative contribution of each step in the long pathway from the rhizosphere to the seed Possible rate limiting steps for micronutrient accumulation in grains should be the primary targets of biotechnological interventions aiming at biofortification Over the last 10 years many micronutrient uptake and transport related processes have been identified at the molecular and physiological level The systematic search for mutants and transcriptional responses has allowed analysis of micronutrient signaling pathways at the cellular level whereas physiological approaches have been particularly useful in describing micronutrient signaling processes at the organ and whole plant level Large scale elemental profiling using high throughput analytical methodologies and their integration with both bioinformatics and genetic tools along with metal speciation have been used to decipher the functions of genes that control micronutrients homeostasis In this research topic we will follow the pathway of metal movement from the soil to the seed and describe the suggested roles of identified gene products in an effort to understand how plants acquire micronutrients from the soil how they partition among different tissues and subcellular organelles and how they regulate their deficiency and overload responses We also highlight the current work on heavy metals and metalloids uptake and accumulation the studies on metal selectivity in transporters and the cross talk between micro and macronutrients Thus we believe a continued dialogue and sharing of ideas amongst plant scientists is critical to a better understanding of metal movement into and within the plant

Springer Handbook of Augmented Reality Andrew Yeh Ching Nee, Soh Khim Ong, 2023-01-01 The Springer Handbook of Augmented Reality presents a comprehensive and authoritative guide to augmented reality AR technology its numerous applications and its intersection with emerging technologies This book traces the history of AR from its early development discussing the fundamentals of AR and its associated science The handbook begins by presenting the development of AR over the last few years mentioning the key pioneers and important milestones It then moves to the fundamentals and principles of AR such as photogrammetry optics motion and objects tracking and marker based and marker less registration The book discusses both software toolkits and techniques and hardware related to AR before presenting the applications of AR This includes both end user applications like education and cultural heritage and professional applications within engineering fields medicine and architecture amongst others The book concludes with the convergence of AR with other emerging technologies such as Industrial Internet of Things and Digital Twins The handbook presents a comprehensive reference on AR technology from an academic industrial and commercial perspective making it an invaluable resource for audiences from a variety of backgrounds
