projects and exercises plus review questions and summary points **Production Phase-Out** Regina Wagner, 2017-08-03

Product development and ramp up is a well researched challenge for industry. However, how to end the production of a product is a blind spot for industry and science, although practitioners are calling for scientific support. This book sheds light on the topic of production phase out by offering measures that can turn a process that is perceived as uninspiring to a success pillar for companies. The book reveals cross industry insights on the relatively new topic of phase out. The interview findings are mirrored with the Phase Out Process Model, which describes activities and tasks to be performed during a phase out. As an instrument to support the implementation of the process model, the Phase Out Production Planning and Control was developed as an add on to standard production IT support. It enables companies to better forecast spare parts needs and expected remaining stock costs at the proposed end of production. Through a qualitative and a conceptual research phase, the findings of this dissertation show that there is a high potential of improving phase out in the industry. This manuscript provides theoretical and managerial implications to pave the way towards enhancing phase outs. This potential can be raised by implementing the proposed formalization structures and mathematical models based on empirical and conceptual research. This book therefore helps to promote the effective implementation of a formalized phase out in company's management practice to make their business more efficient.

Supply Chain Management with SAP APOTM Jörg Thomas Dickersbach, 2009-06-18

The Advanced Planner and Optimiser SAP APOTM is the software from SAP dedicated to supply chain management. This book provides an overview about the supported SCM processes and explains how to implement SAP APOTM in a company. It is written from a long years experience in implementation projects and aims to provide project managers and team members with the necessary know how for a successful implementation project. The focus of the book lies in introducing modelling approaches and explaining the structure and interdependencies of systems, modules and entities of SAP APOTM based on the release SAP SCMTM 2008. Another concern is the integration with SAP ERP, both technically and from a process point of view. Since SAP APOTM projects differ significantly from other SAP projects, some key issues and common mistakes concerning project management are mentioned as well.

Real Optimization with SAP® APO Josef Kallrath, Thomas I. Maindl, 2006-09-02 Optimization is a serious issue touching many aspects of our life and activity But it has not yet been completely absorbed in our culture In this book the authors point out how relatively young even the word model is On top of that the concept is rather elusive How to deal with a technology that finds applications in things as diverse as logistics robotics circuit layout financial deals and traffic control Although during the last decades we made significant progress the broad public remained largely unaware of that The days of John von Neumann with his vast halls full of people frantically working mechanical calculators are long gone Things that looked completely impossible in my youth like solving mixed integer problems are routine by now All that was not just achieved by ever faster and cheaper computers but also by serious progress in mathematics But even in a world that more and more understands that it cannot afford to waste resources optimization remains to a large extent unknown R It is quite logical and also fortunate that SAP the leading supplier of enterprise management systems has embedded an optimizer in his software The authors have very carefully investigated the

capabilities and the limits of APO Remember that optimization is still a work in progress We do not have the tool that does everything for everybody *SAP® Project System Handbook* Kieron Dowling, 2008-02-28 Centralize and Control Enterprise Project Management Plan execute and track projects across the entire lifecycle using SAP Project System PS and the in depth information contained in this comprehensive volume SAP Project System Handbook explains how to configure PS for optimal performance design structures and networks create project blueprints generate cost estimates and materials demands and use the latest SAP tools You will find full details on scheduling work automating and tracking billing and POs triggering events and integrating with most other SAP modules An invaluable reference to PS transaction codes is also included Configure and customize SAP Project System Build PS objects networks and Work Breakdown Structures Use customer and service projects to track sales and billing Understand Assembly Processing concepts Create integrated cost settlement and resource plans Develop financial workforce and materials management blueprints Perform resource related billing using Dynamic Item Processor Profiles Simulate and automatically generate sales documents POs and quotations Manage corporate investments with IM structures and AUCs Construct timesaving Project Network and Milestone Templates Extend functionality with the Project Builder Planning Board and ProMan **Applied SAP BI 7.0 Web Reports: Using BEx Web Analyzer and Web Application Designer** Peter Jones, 2010-07-22 Deliver SAP BI 7.0 Web Reports Distribute integrated accurate and timely data across your enterprise using the Web based reporting components in SAP BI Written by an SAP insider *Applied SAP BI 7.0 Web Reports Using BEx Web Analyzer and Web Application Designer* shows you how to construct effective queries create HTML based reports and combine key analytics into a dashboard style interface Learn how to import data from multiple providers configure custom templates track Key Performance Indicators KPIs and incorporate JavaScript and XHTML Security troubleshooting and third party tools are also discussed in this comprehensive guide Essential BI skills for business professionals Define queries and export them as links with BEx Web Analyzer Create BI specific HTML pages using Web Application Designer and Report Designer Construct reusable templates shortcuts and Web items Design high impact BI dashboards cockpits and billboards Integrate toolbars drilldown capabilities and drag and drop features Publish reporting objects with the Broadcaster and Broadcast Wizard Migrate existing systems and reports to the SAP BI 7.0 platform Add BusinessObjects Crystal Reports and JavaScript components Peter Jones MBA is a principal platinum business applications consultant with SAP Professional Services Consulting He has more than 11 years of consulting and educational experience in a variety of strategic and leadership roles Jones is the author of *SAP Business Information Warehouse Reporting* *Manufacturing, Modelling, Management and Control* George L.
