### **Data, New**

**Technologies, and Global Imbalances** Georges Kotrotsios, 2021-03-03 We are familiar with the idea that technology is neutral and that its impact depends only on how it is used This traditional view has however become untenable Because of its nature and its complex interplay with industry the economy and society technology is no longer neutral This change is being driven by the pervasiveness of data which today are generated everywhere at an unprecedented pace because several technologies are currently reaching maturity Data shape the world around us in a trend that is commonly referred to as digitalization This trend is apparent in every aspect of our lives ranging from our personal environment and health to transportation energy generation and management and industry Digitalization itself generates value enabling the creation of

new products and services It also fosters technological and business innovation in other fields including the manufacturing industry and acts as a lever with which to promote growth Digitalization however also creates imbalances and this happens due to its very nature Such imbalances appear between different parts of the globe and within individual geographical spaces This book explores the multiplicity of mechanisms associated with the growing role that technology and data are playing in the creation of imbalances and goes on to identify certain paths that lead toward mitigation Should we make data publicly accessible and in a transparent way How can policymakers empower governments to address global and local imbalances particularly those generated by technology and data Do we need a global data governance structure that like the World Trade Organization for commerce regulates data use and access
