Models and makes of sewing machines differ in layout and features, but the basic parts are similar. Your machine's manual should show a detailed diagram of your specific model. If you don't have a manual, you can find the manufacturer's website. Often, manuals can be found on the manufacturer's website. Consult your machine's manual for specific instructions.

## For Beginners

Two pieces of fabric joined together, usually the back of the fabric, is called a seam. The seam is a line of stitching that goes right through the middle of an oval. This oval is meant to represent the opening in your needle plate where the needle goes in and out. With a regular straight stitch, the needle hits right in the center of the opening. Measurements are calculated from this center point.

The zig zag stitch is basically a straight stitch modified to contain some width.

This is the stitch you want to use for applique (sewing something on top of something else) or for buttonholes. You can also use this stitch like a straight stitch when you're working with knits, to allow some stretch in the seaming. The zig zag stitch can be loose, or you can shorten the stitch length to make it tight.

### Blind Hem Stitch

This stitch is used for securing hems that shouldn't be seen (hence, 'blind').

The stitches are secured in the back of the fabric, and so are not visible from the front. It does require a special foot and a special technique.

### Basting Stitch

The basting stitch is just like the straight stitch, but set to an extra long length.

It's used to secure items together temporarily – so they stay in place as you plan for final sewing. The basting stitch can also be manipulated in a special way to create gathers.

### Overcasting Stitch

Finally, this stitch is our defense against the unraveling edge.

The overcast stitch is similar to the zig zag, but is normally used on the edge of a seam to prevent fabrics from fraying at the raw edges. It can also be used to finish a hem edge. Check the seams of some of your ready-to-wear knit clothing; you'll find an overcast edge that encapsulates the seam to prevent fraying.
