Anzia, 2013-12-03 Public policy in the United States is the product of decisions made by more than 500 000 elected officials and the vast majority of those officials are elected on days other than Election Day And because far fewer voters turn out for off cycle elections that means the majority of officials in America are elected by a politically motivated minority of Americans Sarah F Anzia is the first to systemically address the effects of election timing on political outcomes and her findings are eye opening The low turnout for off cycle elections Anzia argues increases the influence of organized interest groups like teachers unions and municipal workers While such groups tend to vote at high rates regardless of when the election is held the low turnout in off cycle years enhances the effectiveness of their mobilization efforts and makes them a proportionately larger bloc Throughout American history the issue of election timing has been a contentious one Anzia's book traces efforts by interest groups and political parties to change the timing of elections to their advantage resulting in the electoral structures we have today Ultimately what might seem at first glance to be mundane matters of scheduling are better understood as tactics designed to distribute political power determining who has an advantage in the electoral process and who will control government at the municipal county and state levels **Selective Service**, 1951 **Analysing Public**
