F. Kroll, 2014-07-21 The English Novel Volume I 1700 to Fielding collects a series of previously published essays on the early eighteenth century novel in a single volume reflecting the proliferation of theoretical approaches since the 1970s The novel has been the object of some of the most exciting and important critical speculations and the eighteenth century novel has been at the centre of new approaches both to the novel and to the period between 1700 and 1750 Richard Kroll's introduction seeks to frame the contributions by reference to the most significant critical discussions These include the question of whether and how we can talk about the rise of the novel the vexed question of what might constitute a novel the relationship between the novel and possibly competing genres such as history or the romance the relationship between early male writers like Defoe and popular novels by women in the early eighteenth century the general ideological role played by novels relative to eighteenth century culture are they means of ideological conscription or liberation poststructuralist analyses of identity and gender and the emergence of sentimental and domestic codes after Richardson Since the modern European novel is often thought to have been formed in this period these debates have clear implications for students of the novel in general as well as for those interested in the early enlightenment Headnotes place each essay within the map of these wider concerns and the volume offers a useful further reading list Taken as a whole this collection encapsulates the state of criticism at the present moment      British and Foreign State Papers Great Britain. *Narrative of the Indian Revolt, etc. [Reprinted from the "Illustrated Times."]*, 1858      **The Importance of Feeling English** Leonard Tennenhouse, 2009-02-09 American literature is typically seen as something that inspired its own

conception and that sprang into being as a cultural offshoot of America's desire for national identity. But what of the vast precedent established by English literature which was a major American import between 1750 and 1850? In *The Importance of Feeling English* Leonard Tennenhouse revisits the landscape of early American literature and radically revises its features. Using the concept of transatlantic circulation he shows how some of the first American authors from poets such as Timothy Dwight and Philip Freneau to novelists like William Hill Brown and Charles Brockden Brown applied their newfound perspective to pre-existing British literary models. These American re-writings would in turn inspire native British authors such as Jane Austen and Horace Walpole to reconsider their own ideas of subject, household and nation. The enduring nature of these literary exchanges dramatically recasts early American literature as a literature of diaspora. Tennenhouse argues and what made the settlers' writings distinctly and indelibly American was precisely their insistence on reproducing Englishness on making English identity portable and adaptable. Written in an incisive and illuminating style *The Importance of Feeling English* reveals the complex roots of American literature and shows how its transatlantic movement aided and abetted the modernization of Anglophone culture at large.

ENGLISH LITERATURE ADVANCING THROUGH HISTORY 4 - The Eighteenth Century Petru Golban, 2022-12-28 It appears that literary work possesses eternal temporal validity due to its autonomous aesthetic value whereas criticism provides points of view having temporary and transitory significance. Despite such claims the vector of methodology in our series of books dealing with the history of English literature relies on Viktor Shklovsky, T. S. Eliot, Mikhail Bakhtin and especially Yuri Tynyanov whose main reasoning would be that literature is a system of dominant central and peripheral marginalized elements to us tradition centre versus innovation margin engaged in a battle for supremacy, demarginalization and the right to form a new literary system and the development or historical advancement of literature is the substitution of systems. Roman Jakobson and French structuralism on the whole later Linda Hutcheon with her system and constant and Bran Nicol with the dominant to say nothing about Itamar Even-Zohar and his theory of polysystem to a certain extent Julia Kristeva and even Homi Bhabha as well as our humble contribution we would like to believe maintain Tynyanov's line of thinking and concepts alive which have developed and emerged nowadays more like a kind of neo-formalism. Focusing on literary practice applying critical theory and emerging from within our own teaching experience the books in the present series are theoretical and surveyistic like a monograph whereas their more practical and text-oriented aspect should appeal as a student handbook for didactic purposes in which certain literary works belonging to various writers of different trends, movements and periods are analysed and compared with regard to their source, form, thematic arrangements, ideas, motifs, character representation, strategies, intertextual perspectives, structural or narrative techniques and other aspects.

**A History of the Modern Fact** Mary Poovey,2009-11-30 How did the fact become modernity s most favored unit of knowledge How did description come to seem separable from theory in the precursors of economics and the social sciences Mary Poovey explores these questions in A History of the Modern Fact ranging across an astonishing array of texts and ideas from the publication of the first British manual on double entry bookkeeping in 1588 to the institutionalization of statistics in the 1830s She shows how the production of systematic knowledge from descriptions of observed particulars influenced government how numerical representation became the privileged vehicle for generating useful facts and how belief whether figured as credit credibility or credulity remained essential to the production of knowledge Illuminating the epistemological conditions that have made modern social and economic knowledge possible A History of the Modern Fact provides important contributions to the history of political thought economics science and philosophy as well as to literary and cultural criticism
