### Introduction

Set up a slow cooker in the front of the room (out of reach of students) and pour water into it. Set the temperature on high and ask students to observe what happens when the water heats up. (They will see steam rising.)

Next, place a lid over the top and ask them what they think will happen to the water that is rising. (It will gather together on the lid.)

Finally, ask students to predict what will happen to the water droplets on the inside of the lid when you lift the lid off of the pot. (They will drip downward.)

Tell students that you have just demonstrated a process called the water cycle.

## Water Cycle Spinner

1. Color both wheels and cut them out.
2. Cut along the dashed lines to create three windows on the top wheel.
