Consumer Product Innovation and Sustainable Design Robin Roy, 2015-10-23 Consumer Product Innovation and Sustainable Design follows the innovation and evolution of consumer products from vacuum cleaners to mobile phones from their original inventions to the present day. It discusses how environmental concerns and legislation have influenced their design and the profound effects these products have had on society and culture. This book also uses the lessons from the successes and failures of examples of these consumer products to draw out practical guidelines for designers, engineers, marketers, and managers on how to become more effective at product development, innovation, and designing for environmental sustainability.

Cine-Mobility Han Sang Kim, 2023-12-04 In 1916 a group of Korean farmers and their children gathered to watch a film depicting the enthronement of the Japanese emperor. For this screening a unit of the colonial government's news agency brought a projector and generator by train to their remote rural town. Before the formation of commercial moviegoing culture for colonial audiences in rural Korean towns, many films were sent to such towns and villages as propaganda. The colonial authorities as well as later South Korean postcolonial state authorities saw film as the most effective medium for disseminating their political messages. In *Cine-Mobility* Han Sang Kim argues that the force of propaganda films in Korea was derived primarily not from their messages but from the new mobility of the viewing position. From the first film shot in Korea in 1901 through early internet screen cultures in late 1990s South Korea *Cine-Mobility* explores the association between cinematic media and transportation mobility not only in diverse and discrete forms such as railroads, motorways, automobiles, automation, and digital technologies but also in connection with the newly established rules and restrictions and the new culture of mobility including changes in gender dynamics that accompanied it.
