GALAXY S3 [REDACTED] [REDACTED],2012-10-10 Android Android *Samsung Rising* Geoffrey Cain,2020-03-19 Longlisted for the 2020 Financial Times McKinsey Business Book of the Year Shines an incisive and entertaining light into the secretive world of the South Korean technology giant shaping our digital lives in ways we probably can't imagine Brad Stone Can the Asian giant beat Apple Based on years of reporting on Samsung for the Economist the Wall Street Journal and Time from his base in South Korea and his countless sources inside and outside the company Geoffrey Cain offers the first deep look behind the curtains of the biggest company nobody knows How has this happened Forty years ago Samsung was a rickety Korean agricultural conglomerate that produced sugar paper and fertilizer But with the rise of the PC revolution Chairman Lee Byung chul came up with an incredibly risky multimillion dollar plan to make Samsung a major supplier of computer chips Lee had been wowed by a young Steve Jobs who sat down with the chairman to offer his advice and Lee quickly became obsessed with creating a tech empire Today Samsung employs over 350 000 people over four times as many as Apple and their revenues have grown 40 times their 1987 level Samsung alone now make up more than 20% of South Korea's exports and sells more smartphones than any other company in the world And furthermore they don't just make their own phones but are one of Apple's chief supplier on technology critical to the iPhone Yet their disastrous recall of the Galaxy Note 7 with numerous reports of phones spontaneously bursting into flames reveals the dangers of the company's headlong attempt to overtake Apple at any cost A sweeping insider account of the Korean's company's ongoing war against the likes of Google and Apple *Samsung Rising* shows how a determined and fearless Asian competitor is poised to take on the giants of the tech world Lithium-Ion Cells Yury Koshtyal ,Alexander Rumyantsev,2024-12-24 A large quantity of articles and books have been published on the designated topics However most of the literary sources describe the results of scientific articles on the synthesis and study of perspective materials reveal circuit and design solutions for constructing control systems and manufacturing batteries and are educational materials At the same time a small part of the published sources includes the following descriptions of materials produced industrially and used in the LIC manufacturing process demonstrations of the industrially produced LIC energy and power parameters analysis of the characteristics of manufactured miniature lithium ion cells solid state LICs lithium metal cells and all solid state cells as well as others Considering the popularity of the discussed topics one can hope to find detailed information on the Internet Indeed modern search engines make it possible to locate a sufficiently large number of relevant documents However while conducting such research we encountered the following challenges the data are somewhat fragmented and their systematization and structuring are required search results do not always meet search queries For instance data that were relevant to the topic were found but they did not match the query as accumulated data grow the search time for new information extends the choice of search engine and location different countries affects search results the data are not indexed in search engines although the correct keywords and website were

requested the information disappears due to website updates and the found data require additional processing For example many presentations show changes in the shape of the discharge curves depending on the discharge current strength In addition however Ragone plots are necessary for a correct comparison and therefore the mathematical processing of presented results is required Thus this book was written to systematize and structure information on industrially produced materials for LIC manufacturing and industrially produced and promising LICs and lithium metal rechargeable cells for various applications
