AI Applications and Pedagogical Innovation Wang, Viktor,2025-07-11 AI is rapidly transforming education offering more opportunities for pedagogical innovation By integrating AI tools and systems into teaching and learning environments educators can now personalize instructions and enhance student engagement As educational institutions continue to explore the potential of AI it becomes increasingly important to understand how these innovations can be harnessed to improve learning outcomes and reshape traditional pedagogical models AI Applications and Pedagogical Innovation explores the transformation of AI in the educational field This book provides a critical lens on equity and access encouraging the development of inclusive AI driven solutions that benefit diverse learners worldwide Covering topics such as AI education and technology this book is an excellent resource for researchers educators administrators policymakers instructional designers academicians and more

Advancements in Artificial Intelligence, Blockchain Technology, and IoT in Higher Education Subhendu Kumar Pani,Kamalakanta Muduli,Sujoy Kumar Jana,Srikanth Bathula,Golam Sarwar Khan,2023-06-23 With a need to find alternatives to the traditional face to face teaching and learning during the pandemic this topical volume discusses the best use of technologies in higher education addressing the growing role of AI in the digital transformation of higher education systems With chapters from eminent professors researchers and others involved in higher education from a selection of different countries the volume looks at blockchain and IoT technologies to create smart universities now and for the future

Advanced Process Engineering Control Paul Serban Agachi,Mircea Vasile Cristea,Alexandra Ana Csavdari,Botond Szilagyi,2023-11-20 As a mature topic in chemical engineering

the book provides methods problems and tools used in process control engineering It discusses process knowledge sensor system technology actuators communication technology and logistics design and construction of control systems and their operation The knowledge goes beyond the traditional process engineering field by applying the same principles to biomedical processes energy production and management of environmental issues The book explains all the determinations in the chemical systems or process systems starting from the beginning of the processes going through the intricate interdependency of the process stages analyzing the hardware components of a control system and ending with the design of an appropriate control system for a process parameter or a whole process The book is first addressed to the students and graduates of the departments of Chemical or Process Engineering Second to the chemical or process engineers in all industries or research and development centers because they will notice the resemblance in approach from the system and control point of view between different fields which might seem far from each other but share the same control philosophy

Emerging Technologies in Agriculture, Livestock, and Climate Abid Yahya,2019-12-26 This book provides applications of wireless sensor networks WSN in environmental monitoring with an emphasis on livestock disease detection and agricultural management in Africa to aid farmers This proposed system entails current and innovative monitoring technologies intended to improve agricultural conditions in Africa with a focus on Botswana and addresses the Internet of Things IoT as a set of remote monitoring protocols using WSNs to improve and ensure proper environmental maintenance In this book the author introduces WSNs and how the IoT can be applied to develop a system of smart agriculture in Africa taking into account livestock health climate change impacts on crops and wildlife and technological innovations in response to climate change such as windmills and solar panels The book will be interesting to students and researchers in engineering and life sciences as well as practitioners working with sensing technologies for agricultural monitoring and improvement

International Journal of Engineering Research in Africa Vol. 23 Akii Okonigbon Akaehomen Ibhado,2016-04-05 For your attention is presented the 23rd volume of International Journal of Engineering Research in Africa In this issue collected manuscripts which describe the results of research and engineering decisions in many branches of engineering knowledge and practice such as materials and processing technologies in mechanical engineering construction and in architecture design and research of machines and mechanisms modern methods and algorithms of optimization and data mining and latest researches in area of organization of manufacture We hope this

volume will be useful for a wide audience of readers from students to practicing engineers *Advances in Manufacturing Processes, Intelligent Methods and Systems in Production Engineering* Andre Batako, Anna Burduk, Kanisius Karyono, Xun Chen, Ryszard Wyczółkowski, 2022-04-19 This book forms an excellent basis for the development of intelligent manufacturing system for Industry 4.0 digital and distributed manufacturing and factories for future This book of new developments and advancement in intelligent control and optimization system for production engineering serves as a good companion to scholars manufacturing companies and RTO to improve the efficiency of production systems **LONDON SOCIETY AN ILLUSTRATED MAGAZINE OF LIGHT AND AMUSING LITERATURE FOR THE HOURS OF RELAXATION**, 1869

Data-Driven Optimization of Manufacturing Processes Kalita, Kanak, Ghadai, Ranjan Kumar, Gao, Xiao-Zhi, 2020-12-25 All machining process are dependent on a number of inherent process parameters It is of the utmost importance to find suitable combinations to all the process parameters so that the desired output response is optimized While doing so may be nearly impossible or too expensive by carrying out experiments at all possible combinations it may be done quickly and efficiently by using computational intelligence techniques Due to the versatile nature of computational intelligence techniques they can be used at different phases of the machining process design and optimization process While powerful machine learning methods like gene expression programming GEP artificial neural network ANN support vector regression SVM and more can be used at an early phase of the design and optimization process to act as predictive models for the actual experiments other metaheuristics based methods like cuckoo search ant colony optimization particle swarm optimization and others can be used to optimize these predictive models to find the optimal process parameter combination These machining and optimization processes are the future of manufacturing Data Driven Optimization of Manufacturing Processes contains the latest research on the application of state of the art computational intelligence techniques from both predictive modeling and optimization viewpoint in both soft computing approaches and machining processes The chapters provide solutions applicable to machining or manufacturing process problems and for optimizing the problems involved in other areas of mechanical civil and electrical engineering making it a valuable reference tool This book is addressed to engineers scientists practitioners stakeholders researchers academicians and students interested in the potential of recently developed powerful computational intelligence techniques towards improving the performance of machining processes
