Information Processing and Management Vinu V Das, R. Vijayakumar, Narayan C. Debnath, Janahanlal Stephen, Natarajan Meghanathan, Suresh Sankaranarayanan, P.M. Thankachan, Ford Lumban Gaol, Nussy Thankachan, 2010-04-03 It is my pleasure to write the preface for Information Processing and Management This book aims to bring together innovative results and new research trends in information processing computer science and management engineering If an information processing system is able to perform useful actions for an objective in a given domain it is because the system knows something about that domain The more knowledge it has the more useful it can be to its users Without that knowledge the system itself is useless In the information systems field there is conceptual modeling for the activity that elicits and describes the general knowledge a particular information system needs to know The main objective of conceptual modeling is to obtain that description which is called a conceptual schema Conceptual schemas are written in languages called conceptual modeling languages Conceptual modeling is an important part of requirements engineering the first and most important phase in the development of an information system **Monthly Catalog of United States Government Publications**, 1987

Co-utility Josep Domingo-Ferrer, David Sánchez, 2017-07-06 This book explores the theoretical foundations of co utility as well as its application to a number of areas including distributed reputation management anonymous keyword search collaborative data anonymization digital oblivion peer to peer P2P content distribution ridesharing for sustainable mobility environmental economy business model design and the collaborative economy It evolved from presentations at the 1st Co Utility Workshop held in Tarragona Spain on March 10 11 2016 How can we guarantee that a global society without a common legal framework operates smoothly If generosity honesty and helpfulness do not arise spontaneously one approach would be to design transactions so that helping others remains the best rational option This is precisely the goal of co utility which can be defined in game theoretic terms as any interaction between peers in which the best option for a player to maximize her or his utility is to make sure the other players also enjoy a fair share of utility for example functionality security or privacy Therefore a protocol or mechanism designed using the co utility principle ensures that helping others is the best

Computers and Games for Mental Health and Well-Being Yasser Khazaal, Jérôme Favrod, Anna Sort, François Borgeat, Stéphane Bouchard, 2018-07-12

Recent years have seen important developments in the computer and game industry including the emergence of the concept of serious games It is hypothesized that tools such as games virtual reality or applications for smartphones may foster learning enhance motivation promote behavioral change support psychotherapy favor empowerment and improve some cognitive functions Computers and games may create supports for training or help people with cognitive emotional or behavioral change Games take various formats from board games to informatics to games with interactive rules of play Similarly computer tools may vary widely in format from self help or assisted computerized training to virtual reality or applications for smartphones Some tools that may be helpful for mental health were specifically designed for that goal whereas others were not Gamification of computer related products and games with a numeric format tend to reduce the gap between games and computers tools and increase the conceptual synergy in such fields Games and computer design share an opportunity for creativity and innovation to help create specifically design and assess preventive or therapeutic tools Computers and games share a design conception that allows innovative approaches to overcome barriers of the real world by creating their own rules Yet despite the potential interest in such tools to improve treatment of mental disorders and to help prevent them the field remains understudied and information is under disseminated in clinical practice Some studies have shown however that there is potential interest and acceptability of tools that support various vehicles rationales objectives and formats These tools include traditional games e g chess games popular electronic games board games computer based interventions specifically designed for psychotherapy or cognitive training virtual reality apps for smartphones and so forth Computers and games may offer a true opportunity to develop assess and disseminate new prevention and treatment tools for mental health and well being Currently there is a strong need for state of the art information to answer questions such as the following Why develop such tools for mental health and well being What are the potential additions to traditional treatments What are the best strategies or formats to improve the possible impact of these tools Are such tools useful as a first treatment step What is the potential of a hybrid model of care that combines traditional approaches with games and or computers as tools What games and applications have already been designed and studied What is the evidence from previous studies How can such tools be successfully designed for mental health and well being What is rewarding or attractive for patients in using such treatments What are the worldwide developments in the field Are some protocols under development What are the barriers and challenges related to such developments How can these tools be assessed and how can the way

that they work and for whom be measured Are the potential benefits of such products specific or can these additions be attributed to nonspecific factors What are the users views on such tools What are the possible links between such tools and social networks Is there a gap between evidence based results and market development Are there any quality challenges What future developments and studies are needed in the field **Digital Geography** Maxim Bakaev,Radomir Bolgov,Andrei V.
