ThirdWay, 1990-12 Monthly current affairs magazine from a Christian perspective with a focus on politics society economics and culture **Burnt by Democracy** Jacqueline Kennelly, 2023-11-30 Burnt by Democracy traces the political ascendance of neoliberalism and its effects on youth The book explores democracy and citizenship as described in interviews with over forty young people ages 16 to 30 who have either experienced homelessness or identify as an activist living in five liberal democracies Canada Australia New Zealand the United States and the United Kingdom Highlighting significant cuts to social and affordable housing astronomical increases in the costs of higher education and the transformation and erosion of state benefits systems Jacqueline Kennelly argues that democracy's decline is not occurring because young people are apathetic or focused on informal politics or unaware of their civic duties Rather it is because of collective misunderstanding about how democracy is actually structured how individuals learn to participate and how growing wealth inequality has undermined the capacity of those at the bottom to meaningfully advocate for changes that might improve their conditions Against a vivid and often heart breaking backdrop of stories from young people struggling to survive and thrive under conditions of ever expanding state retrenchment and inequality Burnt by Democracy makes a timely and impassioned plea for protecting and strengthening democracy by truly levelling the playing field for all **Obesity and Metabolic Surgery** Jürgen Ordemann, Ulf Elbelt, 2022-10-27 This book presents the surgical therapy of obesity and metabolic diseases in a practice oriented and detailed way The specific surgical procedures with their indications performance and risks are described precisely in words and pictures Special emphasis is placed on the choice of the appropriate surgical procedure for the individual patient In addition to the mechanisms of action interdisciplinary preoperative evaluation of the patient and postoperative aftercare are explained Furthermore surgical internal and psychosomatic complications and complication management are described Information on obesity center organization and alternative bariatric therapies complete the volume This book is a translation of the original German 1st edition Adipositas und metabolische Chirurgie by Jürgen Ordemann Ulf Elbelt published by Springer Verlag GmbH Germany part of Springer Nature in 2017 The translation was done

Roberts,2016-05-01 Although studies of fascism have constituted one of the most fertile areas of historical inquiry in recent decades more and more scholars have called for a new agenda with more research beyond Italy and Germany less preoccupation with definition and classification and more sustained focus on the relationships among different fascist formations before 1945 Starting from a critical assessment of these imperatives this rigorous volume charts a historiographical path that transcends rigid distinctions while still developing meaningful criteria of differentiation Even as we take fascism seriously as a political phenomenon such an approach allows us to better understand its distinctive

contradictions and historical variations Language, Cognition and Gender Alan Garnham, Jane Oakhill, Lisa von Stockhausen, Sabine Sczesny, 2016-08-08 Gender inequality remains an issue of high relevance and controversy in society Previous research shows that language contributes to gender inequality in various ways Gender related information is transmitted through formal and semantic features of language such as the grammatical category of gender through gender related connotations of role names e.g. manager secretary and through customs of denoting social groups with derogatory vs neutral names Both as a formal system and as a means of communication language passively reflects culture specific social conditions In active use it can also be used to express and potentially perpetuate those conditions The questions addressed in the contributions to this Frontiers Special Topic include how languages shape the cognitive representations of gender how features of languages correspond with gender equality in different societies how language contributes to social behaviour towards the sexes how gender equality can be promoted through strategies for gender fair language use These questions are explored both developmentally across the life span from childhood to old age and in adults The contributions present work conducted across a wide range of languages including some studies that make cross linguistic comparisons Among the contributors are both cognitive and social psychologists and linguists all with an excellent research standing The studies employ a wide range of empirical methods from surveys to electro physiology The papers in the Special Topic present a wide range of complementary studies which will make a substantial contribution to understanding in this important area **Going to the Countryside** Yu Zhang, 2020-03-03 Since the beginning of the twentieth century modern Chinese intellectuals reformers revolutionaries leftist journalists and idealistic youth had often crossed the increasing gap between the city and the countryside which made the act of going to the countryside a distinctively modern experience and a continuous practice in China Such a spatial crossing eventually culminated in the socialist state program of down to the villages movements during the 1960s and 1970s What then was the special significance of going to the countryside before that era Going to the Countryside deals with the cultural representations and practices of this practice between 1915 and 1965 focusing on individual homecoming rural reconstruction revolutionary journeys to Yan'an the revolutionary going down to the people as well as going to the frontiers and rural hometowns for socialist construction As part of the larger discourses of enlightenment revolution and socialist industrialization going to the countryside entailed new ways of looking at the world and ordinary people brought about new experiences of space and time initiated new means of human communication and interaction generated new forms of cultural production revealed a fundamental epistemic shift in modern China and ultimately created a new aesthetic social and political landscape As a critical response to the urban turn in the past few decades this book brings the rural back to the central concern of Chinese cultural studies and aims to bridge the city and the countryside as two types of important geographical entities which have often remained as disparate scholarly subjects of inquiry in the current state of China studies Chinese modernity has been characterized by a dual process that created problems from the vast gap between

the city and the countryside but simultaneously initiated constant efforts to cope with the gap personally collectively and institutionally The process of crossing two distinct geographical spaces was often presented as continuous explorations of various ways of establishing the connectivity interaction and relationship of these two imagined geographical entities Going to the Countryside argues that this new body of cultural productions did not merely turn the rural into a constantly changing representational space most importantly the rural has been constructed as a distinct modern experiential and aesthetic realm characterized by revolutionary changes in human conceptions and sentiments Drug Abuse and Society Saroj
