Monitoring functional groups of herbivorous reef fishes as indicators of coral reef resilience : a practical guide for coral reef managers in the Asia Pacific region Alison L. Green, David R. Bellwood, 2009 This document provides practical advice to field practitioners based on an example from the Asia Pacific Region Key functional groups of herbivores are identified species are assigned to each functional group and methods are provided for monitoring their abundance biomass and size structure This document represents the first attempt to develop a monitoring program that is specifically designed to monitor key functional groups of herbivorous reef fishes as indicators of coral reef resilience Even though it is based on the best available information it is important to remember that the science underpinning these methods is still new and developing Further research is now required to address knowledge gaps and refine monitoring methods Executive summary **Coral Reefs of the Eastern Tropical Pacific** Peter W. Glynn, Derek P. Manzello, Ian C. Enochs, 2016-08-12 This book documents and examines the state of health of coral reefs in the eastern tropical Pacific region It touches on the occurrence of coral reefs in the waters of surrounding countries and it explores their biogeography biodiversity and condition relative to the El Niño southern oscillation and human impacts Additionally contained within is a field that presents information on many of the species presented in the preceding chapters **Fishes of the World** Joseph S. Nelson, 2007-08-27 Of all the literature I use while preparing field guides for the Food and Agriculture Organization of the United Nations Nelson's Fishes of the World is by far the one I refer to most often This book is a standard reference I continue to use it extensively in the ichthyology courses I teach particularly in laboratory sessions Kent E Carpenter Old Dominion University Fishes of the World is a unique and essential resource for anyone seriously interested in the diversity and evolution of fishes The family accounts provide quick summaries of current knowledge on all groups of living fishes and many key fossil taxa It is a required work for every student in my laboratory William E Bemis Kingsbury Director of Shoals Marine Laboratory Cornell University Only classics are known by the single name of their author and certainly Nelson's book has for four editions been such a book for all those who seek an accessible up to date readable reference on fish classification Once again Nelson presents a balanced view of the sometimes tumultuous but ever exciting study of the phylogenetic relationships and classification of fishes In doing so Nelson makes an excellent case for organismal biology highlighting the many and varied morphological characters we use to diagnose fish taxa and differentiate among the 515 families of living species Lynne R Parenti Curator of Fishes and Research Scientist National Museum of Natural History Smithsonian Institution Fishes of the World Fourth Edition is the updated

edition of a true classic in the field A unique presentation of a modern cladistically based classification of all the major living and fossil fish groups this indispensable reference helps scientists and others identify and classify specimens make familial connections understand the evolution of fishes and springboard into further research The taxonomy of fishes presented includes the anatomical characteristics distribution common and scientific names and phylogenetic relationships for all 515 families of living fishes Packed with representative species drawings and information on phylogenetic relationships this informative Fourth Edition features Both fossil and extant species More than 500 illustrations Fully vetted scientific and common names An extensive bibliography
