Locating Places

Why We Remember

The Southwest region has a varied and colorful history. The Navajo, the Spanish explorers, and the region's Mexican neighbors have all left their marks on the culture of the Southwest. Now, technology and space exploration are helping the region to develop even more. The Southwest remains a fine landscape for those who want to explore.

Regions Textbook Grade 4:

Reforming Education in the Regions of Russia Mary Canning, Peter R. Moock, Timothy E. Heleniak, 1999-01-01 Russia's educational system with broad access and high levels of scholarly achievement has long been a source of strength. The Soviet system however was grossly overcentralized, inefficient and lacking in accountability. In the last decade, attempted rapid decentralization has not been well designed since there has been no commensurate transfer of resources and levels of responsibility have remained unclear. Unless corrected soon, the harmful impact on educational quality and equity could be very serious. The purposes of this report are to analyze the nature of the current problems and to discuss policy options open to the Russian Government in its efforts to improve educational efficiency, preserving and even improving equitable access without sacrificing traditions of academic excellence. This report is based on analysis of trends across the 89 Russian regions and case studies. In its conclusions, the report draws on this regional experience to suggest reform options. Among other proposals, efficiency could be increased by giving schools increased financial autonomy, using of per capita financing formulae, and beginning to rationalize the teaching force and improve its quality. A national system of student assessment might help both to raise quality and improve the equity of access to highly selective institutions. Reforms are required to improve the market responsiveness of first level vocational education and especially to avoid excessive and premature specialization. Education practitioners and policy makers will find this publication of interest.

Oxford Textbook of Neuro-Oncology, 2025-04-03 Part of the Oxford Textbooks in Clinical Neurology series, the Oxford Textbook of Neuro-Oncology is a comprehensive account of the diagnosis, management and treatment of tumours of the nervous system in children and adults. The second edition covers the most up to date surgical, medical and radiation therapies of nervous system tumours, as well as tumour related and treatment related complications. Chapters are organized according to the widely accepted and referenced World Health Organization (WHO) Classification of Nervous System Tumours and have been fully updated and expanded based on the most recent 2021 classification. Written by a global team of authors who are leading multidisciplinary experts in each of the tumour types covered, this textbook will be a valuable resource for neurologists, neurosurgeons, neuro-oncologists, radiation oncologists, medical oncologists and trainees in these disciplines.

Mother Tongue-Based Multilingual Education in the Asia-Pacific Region Suwilai Premasiri, David Hirsh, 2025-01-14 This book sheds light on the role of mother tongue based multilingual education (MTB-MLE) as a means to enhance educational outcomes, creating a space for non-dominant languages alongside more dominant regional, national and international languages. It brings together a number of underlying concerns, including the maintenance of non-dominant languages, the context of language policy and planning in shaping this process, the poor educational outcomes of many speakers of non-dominant languages in mainstream education programs, and the economic and social importance of becoming multilingual. It focuses on the experiences of those involved in MTB-MLE programs in early

childhood primary secondary tertiary and adult education from numerous settings in the Asia Pacific region This book provides readers with a detailed overview of MTB MLE with a clear and insightful portrayal of the complex nature of policy and practice in both more accommodating and less accommodating sociopolitical environments *Russian-European Relations in the Balkans and Black Sea Region* Vsevolod Samokhvalov, 2017-06-19 This book provides a detailed analysis of Russia's great power identity and the role of Europe in forming this identity Great power identity implies an expansionist foreign policy and yet this does not explain all the complexities of the Russian state For instance it cannot explain why Russia decided to take over Crimea but provided only limited support to break away regions in Eastern Ukraine Moreover if Russia is in geo economic competition with Europe why has no serious conflict erupted between Moscow and other post Soviet states which developed closer ties with the EU Finally why does Putin maintain relationships with the European countries that imposed tough economic sanctions on Russia Vsevolod Samokhvalov provides a more nuanced understanding of Russia's great power identity by drawing on his experience in regional diplomacy and research and applying a constructivist methodology The book will appeal to students and scholars of international relations in particular Russian European relations Russian foreign policy and Russian studies

Getting Textbooks to Every Child in Sub-Saharan Africa Birger Fredriksen, Sukhdeep Brar, 2015-05-22 Textbooks play a key role in enhancing the quality of learning especially in the context of low income Sub Saharan African SSA countries characterized by large class size poorly motivated and inadequately trained teachers and short effective school years There are also high rates of illiteracy among parents and few reading materials at home for the student to bank on Despite extensive investments by governments the World Bank and other development partners the majority of students in primary and secondary schools in SSA still lack the benefit of access to textbooks and the key reason for this shortage is affordability textbooks are generally much more costly in SSA than in other developing regions The need to increase access to key learning resources is of particular urgency because most African countries experience low learning outcomes which in part contributes to a high drop out rate Only two thirds of those who enter school reach the final grade and only about half of these master basic numeracy and literacy skills And although quality improvement depends on many factors inside and outside the school there is wide agreement that availability of textbooks is both an indispensable and a cost effective way of improving the quality of the learning process A recent World Bank study examined the actual costs of textbooks the scope for cost reduction the portion of a national budget countries allocate to teaching and learning materials TLMs and hurdles in the way of making textbooks available to student Some interesting findings from the study The availability of affordable textbooks to all students could be dramatically improved by devoting an estimated 3 to 4 percent of the primary education budget and 6 to 7 percent of the secondary education budget The production process methods copyright length of print runs effective procurement practices rather than the production costs should be the target of cost saving strategies The increased integration of ICTs into education in SSA can provide important

opportunities for promoting availability of electronic TLMs but electronic TLMs are not a substitute for printed TLMs including textbooks

The International Handbook of Educational Research in the Asia-Pacific Region J.P. Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region

Education, Cultures, and Economics Angela W. Little, Fiona E. Textbook of Surgical Oncology Graeme J. Poston,Daniel Beauchamp,Theo Ruers,2007-11-15 Surgery alone cures more than 60% of those patients whose cancer are amenable to curative treatment Surgical oncology is not universally accepted as a unified discipline worldwide There are many reasons for this situation including the drive to anatomic site specialization but also the need to provide comprehensive general surgical provision to more isolated and rural communities Textbook of Surgical Oncology written by a highly acclaimed list of international authors comprehensively covers the role of the surgical oncologist in the management of patients with solid tumors This book provides a state of the art review of cancer surgery for senior residents approaching certification at the completion of their training as well as providing an up to date reference work for established clinicians in their day to day practice including those in general surgery surgical oncology urologists gynecologists thoracic neurosurgical radiation oncologist and medical oncologists

Education Sector Plans and their Implementation in Developing Countries Roy Carr-Hill,2023-03-09 This book examines the factors affecting the successful implementation of Education Sector Plans in developing countries It provides a detailed comparison that draws on data from 27 countries to offer careful research conclusions and policy recommendations Offering a detailed comparison of the schooling situation e g availability of potable water and toilets provision for the disabled as well as educational outcomes both test scores and percentages out of school from the 27 countries using empirical evidence the book examines the resources that have been invested in different education sectors investigating the development and success of each plan The volume uses correlation analysis to compare factors including the availability of government funding national characteristics ministerial decisions influences of country and donor stakeholders as well as district and school level issues Thorough comparative analysis of the data is then demonstrated with two measures of achievements to identify which factors can be considered as the most important in order to reach realistic policy and

research conclusions Timely and engaging this book will be of great interest to researchers scholars and postgraduate students in the field of education and international development comparative education and international education more broadly *Learning From Textbooks* Bruce K. Britton, Arthur Woodward, Marilyn Binkley, 2012-11-12 It is surprising that there is so little research on textbooks given their centrality to teaching and learning in elementary and secondary schools Textbooks have become a focus of political and cultural controversy advocating a multicultural curriculum that has sparked some vigorous protests Research is absent in this debate therefore questions of legitimate knowledge the role of textbooks textbook design policy selection issues and economic issues concerning the marketplace are not part of the current debate Without insights of research on considerate text mentioning illustrations and so forth the current controversy will result in publishers responding to demands for more content not less thus textbooks will become compendia of information that on the surface satisfy everyone This volume demonstrates how research on important issues relative to textbook design can advance our knowledge about what makes textbooks effective learning tools and thus inform policymakers publishers and those involved in textbook selection Representing pure and applied approaches researchers present papers on the quality of writing the role of questions the role of pictures and illustrations and the role of auxiliary materials in the design of effective textbooks The chapters provide insight into research and its application to textbook design and improvement stimulating others to follow this lead
