Hunt, Roy E. Leach, Joseph R. Curro, J.L. Gatz, Richard L. Stowe, 1971 Geological field reconnaissance and geophysical evaluations were made of four areas within the Laramie Range for the purpose of selecting a site suitable for construction of a hard rock prototype test silo The investigated areas are located between Laramie and Cheyenne in southeastern Wyoming within the outcrop belt of Sherman granite Within three areas fourteen sites or prospective test beds were investigated by means of seismic surveys and core borings An evaluation of the data gathered in these areas revealed that Site P6 2A was suited for location of a hard rock prototype silo and this site was investigated in more detail than were the other sites This report describes the manner in which field tests were performed types of information gathered and data used to evaluate the sites i e geologic and topographic mapping core borings in situ velocity measurements laboratory and in situ strength tests groundwater studies etc Author **Preshot Material Property Investigation for the Mixed Company Site: Summary of Subsurface Exploration and Laboratory Test Results** John Q. Ehr Gott, 1973 This report summarizes the investigations conducted in support of Mixed Company Event III a 500 ton high explosive experiment conducted near Grand Junction Colorado The primary purpose of the project was to provide a representative geologic profile of the Mixed Company site along with associated constitutive properties for use in the preshot two dimensional ground shock calculations planned under Project LN 312 This report describes results from 1 a field investigation program consisting of a geologic survey a refraction seismic survey and an exploration boring and sampling program 2 a laboratory test program consisting of static and dynamic uniaxial strain tests isotropic compression tests triaxial shear tests and static tension tests and 3 the analyses applied to the data obtained from both of these programs in order to develop a recommended site profile and matching set of constitutive
