**Titles Without Merit** Francis Machingura, Munyaradzi Mawere, 2024-05-29 This book examines the controversial issues surrounding the desire for titles both earned and unearned in Zimbabwe and beyond The desire for titles is often associated with the quest for status power class and recognition Unfortunately this desire has resulted in faking and the problem of distinguishing genuine PhDs from fake ones The unscrupulous quest for fake degrees is referred to in this book as Titlemania or Taitolomania The scramble for titles has not spared community leaders across the divide Of concern is the failure of higher education students to use their earned titles to contribute to the search for solutions to societal problems through national technological development The perspectives of the contributors in this volume provoke debates on the value of doctorates in Africa and Zimbabwe in particular considering that most PhD holders are not using their degrees to contribute to national development production of goods and services and the improvement of societal conditions

Teacher in Zimbabwe, 2014 International Handbook of Leadership for Learning Tony Townsend, John MacBeath, 2011-07-10 The International Handbook of Leadership for Learning brings together chapters by distinguished authors from thirty one countries in nine different regions of the world The handbook contains nine sections that provide regional overviews a consideration of theoretical and contextual aspects system and policy approaches that promote leadership for learning with a focus on educating school leaders for learning and the role of the leader in supporting learning It also considers the challenge of educating current leaders for this new perspective and how leaders themselves can develop leadership for learning in others and in their organisations especially in diverse contexts and situations The final chapter considers what we now know about leadership for learning and

looks at ways this might be further improved in the future The book provides the reader with an understanding of the rich contextual nature of learning in schools and the role of school leaders and leadership development in promoting this It concludes that the preposition for between the two readily known and understood terms of leadership and learning changes everything as it foregrounds learning and complexifies rather than simplifies what that word may mean Whereas common terms such as instructional leadership reduce learning to outcomes leadership for learning embraces a much wider developmental view of learning *Facets of Power*, 2023-01-10 The diamond fields of Chiadzwa among the world's largest sources of rough diamonds have been at the centre of struggles for power in Zimbabwe since their discovery in 2006 Against the backdrop of a turbulent political economy control of Chiadzwa's diamonds was hotly contested By 2007 a new case of blood diamonds had emerged in which the country's security forces engaged with informal miners and black market dealers in the exploitation of rough diamonds violently disrupting local communities and looting a key national resource The formalisation of diamond mining in 2010 introduced new forms of large scale theft displacement and rights abuses *Facets of Power* is the first comprehensive account of the emergence meaning and profound impact of Chiadzwa's diamonds Drawing on new fieldwork and published sources the contributors present a graphic and accessibly written narrative of corruption and greed as well as resistance by those who have suffered at the hands of the mineral's secretive and violent beneficiaries If the lessons of resistance have been mostly disheartening ones they also point towards more effective strategies for managing public resources and mounting democratic challenges to elites whose power is sustained by preying on them *Refugee Learner Experiences.
