APNU AFC 14.1 percent from 2015 to 2020 and PPP II the current PPP administration 12.5 percent during its first two years in office. Over the fourteen years from 2009 to 2022 the four largest agencies consumed 42.5 percent of total Central Government expenditure. Under PPP I these agencies spent 15 percentage points more on capital costs than they did under APNU AFC. However, under the latter government they spent more than 10 percentage points on the amorphous category Other Charges. These anomalies are hard to explain because there were no functional enhancements or reach of coverage by these agencies. Incredibly, the Ministry of Finance (MoF), the largest agency for all but one year, spent 46.1 percent of what the Ministry of Public Works incurred on public infrastructure for the entire country. An important avenue of political patronage is the employment of contract and temporary workers who are hired outside of the public service legislative framework. These workers comprised half of the MoF's workforce over the fourteen year period and the last six years of PPP I for the Ministry of Health; that figure is around 37.0 percent for both periods. Employment patronage rose during APNU AFC's term of office to 53.8 percent in the MoF and to 41.8 percent in the MoH. Employment patronage at these two big agencies was lower during PPP I than the six years of the APNU AFC Government. Patronage employment is considerably lower with the PPP II than all previous regimes. The strategic deviation is explained by the rise of three separate categories of low and unskilled workers who account for 48.5 percent and 57.7 percent of workforce of the MoF and the MoH respectively. These figures are more than 10 percentage points larger than those of all previous administrations. In effect, the PPP doles out patronage away from hiring outside of the public service legislative framework to hiring within it. Not only has the PPP legalized patronage, it has also increased it significantly.
