The word 'love' is observed to have distinct meanings in various settings and contexts. Different people from various cultural settings would tend to have different perceptions about love. Generally, love refers to some kind of inexplicable feeling which is felt by people towards others, probably those of the opposite sex. Relationship on the other hand would refer to the condition of people being connected or associated with each other.

We have all experienced love at one moment of life, but it is as though there is still much we don't know about love itself. Humans have always asked inexplicable questions about love such as, "Why do we fall in love?" or "What makes us love others?" We may not necessarily have perfect answers for all the questions regarding love but there is no doubt that we have been closer to the right answers for most of these questions through the perception of psychologists.

For instance, according to love psychologists, the reason as to why we fall in love will depend on our minds. The way our minds perceive love is what comes out to us as love. Sometimes, these perceptions may match with the perceptions of another person and in that case love is certain to be realized.

Different groups of people have different views about love. Some communities would see it as something that would be contained in the eyes while others just associate it with blood thus the observations 'love is in the eyes of the beholder' and 'blood is thicker than water' respectively.

However, some aspects in life have come up to disqualify these perceptions, making people to search for other alternative explanations. For instance, let us consider the situation of blind people. Does their incapability to see hinder them from loving? More importantly, if love was really contained in the blood, will there be any cases concerning lost identities in life as we can see today?

Having asked ourselves these questions, it would be easy for us to appreciate the psychological view of love that is determined by our minds as the perfect answer to most of the questions we frequently ask ourselves regarding love. The issue of love and what makes people fall in love has been a subject of debate all over the world for a very

Therapeutic Psalm(s) Michael Y. Obeng,2011-01-13 These poems show how God has preserved and allowed me to seek Him with all of my heart soul mind will and body Many things have occurred in my life and by the grace and love of God I have gained wisdom and understanding regarding my past present and future There was a certain knowledge about my life that I have discovered through my love for reading and experience I do not know what exactly is going to happen in the future but whatever may come in my way I will understand why The Bible is right when it teaches that mankind is full of wickedness and how the natural man or woman seeks not God Mankind is not perfect therefore mankind cannot please God with all of its terrible efforts and self righteousness The gospel of John chapter 3 16 promises anyone who would trust and depend on Jesus Christ for salvation would have eternal life Human beings have tried and are still trying to separate me from the love of God which is in Christ Jesus They know that Jesus Christ is superior to them therefore they want to belittle the gospel and the person of Jesus Christ How could anyone fight with omnipotent God and win Resources in Education

Guatemala Michael Maravilla Alba,1992 Growth, Development and Poverty Alleviation in the Asia-Pacific Kartik Chandra Roy,Srikanta Chatterjee,2007 This volume presents a variety of papers on issues related to growth development and poverty prepared by specialists in their particular development related fields While the living standards of most people around the world have improved over time in absolute terms many are still in desperate poverty The major bulk of humanity lives in the continent of Asia and it is here that some of the more spectacular contrasts in both economic growth and levels of affluence and destitution can be found Whether India and China can continue to grow as fast as they have done in recent years remains to be seen More importantly perhaps whether growth alone can reduce poverty in these countries and in others is a question that needs to be discussed and understood Outside of India and China the African continent particularly the nations in Sub Saharan Africa is home to large numbers of poor and deprived humanity Many of these countries are natural resource rich but that has not enabled many of them to achieve adequate growth and reduce poverty As countries grow they put extra pressure on both global resources and the natural environment The question as to whether there are finite limits to economic growth in a global sense is one that has long exercised thinkers Technological progress has often enabled countries to economise on resource use without sacrificing growth Whether that can continue indefinitely is also a

question that has acquired a new urgency with the recent faster growth experience of the most populous countries
