**Houses from Books** Daniel D. Reiff, 2010-11-01 Many homes across America have designs based on plans taken from pattern books or mail order catalogs In Houses from Books Daniel D Reiff traces the history of published plans and offers the first comprehensive survey of their influence on the structure and the style of American houses from 1738 to 1950 Houses from Books shows that architectural publications from Palladio's I Quattro Libri to Aladdin's Ready Cut Homes played a decisive role in every aspect of American domestic building Reiff discusses the people and the firms who produced the books as well as the ways in which builders and architects adapted the designs in communities throughout the country His book also offers a wide ranging analysis of the economic and social conditions shaping American building practices As architectural publication developed and grew more sophisticated it played an increasingly prominent part in the design and the construction of domestic buildings In villages and small towns which often did not have professional architects the publications became basic resources for carpenters and builders at all levels of expertise Through the use of published designs they were able to choose among a variety of plans styles and individual motifs and engage in a fruitful dialogue with past and present architects Houses from Books reconstructs this dialogue by examining the links between the published designs and the houses themselves Reiff's book will be indispensable to architectural historians architects preservationists and regional historians Realtors and homeowners will also find it of great interest A catalog at the end of the book can function as a guide for those attempting to locate a model and a date for a particular design Houses from Books contains a wealth of photographs many by the author that enhance its importance as a history and guide

**Vernacular Architecture** Howard Davis, 2024 Vernacular Architecture Critical and Primary Sources brings together for the first time a collection of essential and foundational readings in the study of vernacular architecture and the traditional building cultures of the world Collating scholarly historical texts from the last 200 years from a wide range of sources this four volume set offers a key knowledge resource for the field It creates for the first time a comprehensive framework through which to understand the critical aspects and diverse interpretations of vernacular architecture studies vital to much ongoing research in the built environment in heritage studies and material culture studies Each volume includes a substantial contextualizing introduction while the texts are arranged according to themes which correspond to the chronological and intellectual

development of the field reflecting the subject's evolution from primarily rural romantic and traditional interpretations through to thoroughly contemporary and interdisciplinary definitions of the field. These contemporary perspectives connect to new scholarship on the explosive growth of cities and the global urban future and are thus the concern not only of scholars who are seeking to understand the built world but also of professional architects, planners and citizens who continue to draw lessons from the vernacular and to apply them to design procedures and political formations. Accordingly, this is a reference collection which enables both a critical understanding of the subject and a way to connect theory with contemporary professional practice. This work will represent an essential addition to libraries and a major scholarly resource for architecture, building conservation, historic preservation, town planning, material culture, art history, geography and heritage studies.

Experiencing American Houses Elizabeth Collins Cromley, 2023-09-29. A well-illustrated holistic overview of how American domestic spaces have changed over four hundred years. *Experiencing American Houses* encourages readers to think creatively about houses in terms of their function as opposed to their appearance. This captivating volume helps the reader step into the lived experience of the evolving American house, understanding for example why a nineteenth-century dining room might include a bed or why the kitchen as we know it did not evolve until the turn of the twentieth century. By carrying her study from the colonial period to the present, Elizabeth Collins Cromley makes the domestic spaces of the past feel like vital precursors to today's experience. Beginning with cooking spaces, Cromley examines how multi-use areas consolidated into dedicated rooms for cooking, from fires on an earthen floor to sleek modern spaces with twenty-first-century appliances. Next, the author looks at ways social class, income and local custom framed which kinds of spaces became suitable for socializing and entertaining and what they should be called: sitting room, drawing room, hall, living room, family room or parlor. Distinct from cooking spaces, Cromley discusses eating spaces which morphed from multi-use areas to separate dining rooms and back again. The author covers spaces for sleeping, health and privacy as well as circulation, the ways that we move through a house, analyzing the functions of such little-studied features as hallways, back doors and staircases. Finally, Cromley takes on the evolution of storage, which began mainly because of the need to store and preserve food. Clothing closets grew from oddly shaped afterthoughts to generous walk-ins while increases in material wealth led to the need for storage outbuildings. This accessible volume, informed by up-to-date scholarship in vernacular architecture and disciplines far beyond

it provides students and readers necessary context to understand the development of the historic and contemporary houses they encounter
