In today's technological society, online courses are quickly becoming the new normal in terms of collegiate instruction, providing the ideal environment to flip the classroom and encourage students to hone critical thinking skills by engaging deeply with historical sources. While much of the attention in online teaching focuses on STEM, business and education courses, online history courses have also proven consistently popular. However, due to the COVID-19 pandemic, new history instructors are rushed into online teaching with little or no training or experience, creating a need for a guide to ease the transition from classroom to online course development and teaching. A timely text, this book aims to provide both new and experienced college history teachers the information they need to develop dynamic online courses. **Resources in Education**, 1998 [Teaching Economics in Troubled Times](#) Mark C.
