Debunkum Beaver Pega How-to Guide Debunkum Beaver, 2019-05-18 Why Create a Pega How to Guide With the Debunkum Beaver Pega How to Guide series you would have an arsenal of tools at your disposal Whenever there is a new project or a new feature required all you have to do is just to pull out one of these guides Can you visualise a situation where all similar features have the same way of implementation with the same sequence of steps and number of rules and anyone who looked at the rules knew exactly how and why each rule was implemented as such any deviations and bugs that were introduced due to carelessness would simply stand out by itself easily identifiable and easy to fix wouldn't this be a wonderful Pega World Well that is the core objective of the Debunkum Beaver Pega How to Guide series Why Create This Installing and Testing AES Pega How to Guide Firstly if you followed the instructions in Pega Community knowledgebase KB closely it will not work not to mention the lack of screenshots making it extremely difficult to follow the instruction Secondly the KB is not organised in a sequence that make sense in a real life scenario In a real life scenario after installation you would want to configure it followed by testing and validating the installation To achieve that using Pega KB you would need to search thorough and collate multiple documents which is error prone and time consuming Lastly the AES installation KB had been archived and is no longer being maintained so an end to end guide is critical For this guide the author had gone through the process of installing and testing AES and presented all the relevant screenshots to you At the same time highlighting specific issues along with instructions This will make it easier for anyone who is interested to install and test AES accomplish the task in a much faster and efficient way Sample chapters available at HowToDebunkumBeaver.com *Handbook of Research on Natural Computing for Optimization Problems* Mandal, Jyotsna Kumar, Mukhopadhyay, Somnath, Pal, Tandra, 2016-05-25 Nature inspired computation is an interdisciplinary topic area that connects the natural sciences to computer science Since natural computing is utilized in a variety of disciplines it is imperative to research its capabilities in solving optimization issues The Handbook of Research on Natural Computing for Optimization Problems discusses nascent optimization procedures in nature inspired computation and the innovative tools and techniques being utilized in the field Highlighting empirical research and best practices concerning various optimization issues this publication is a comprehensive reference for researchers academicians students scientists and technology developers interested in a multidisciplinary perspective on natural computational systems PCSSA - Pega Certified Senior System Architect Exam Practice Questions & Dumps Quantic Books, The Pega Certified Senior System Architect PCSSA exam test is for Pega Architects who wish to increase their Pega skills It is especially useful for those leading or participating in projects This certification includes all the questions you will face in the exam center This certification validates your ability to use Pega to design and build for reusability across multiple lines of business Preparing for the Pega Certified Senior System Architect PCSSA exam to become a Certified Senior System Architect PCSSA expert by Pega Here we have brought Best Exam Questions for you so that you

Pega Snippets: Using External Tables

Debunkum Beaver,2021-02-01 Introduction to Pega Snippets Using External Tables Pega stores its data in the database via concrete classes which are automatically mapped to a database table This database table typically includes a BLOB column Sometimes you might be provided with data from an existing database table and instead of porting all the data into Pega concrete classes with the BLOB column you might simply want to create a class that points to it without changing its original table structure This Using External Tables Snippets explores this mapping as well as other usages Pega Snippets content is designed to evolve over time therefore its content will be enhanced and will get richer over time Why Create a Pega Snippets The main reason is that writing a REAL book takes a lot of time and effort I have acquired a lot of knowledge and samples over the years and if I were to share it via the traditional book publishing mechanism it would take a long time to share all of those Therefore a better way would be to share it via the Snippets Series which is a collection of task specific steps with screenshots to demonstrate how to do specific tasks in Pega The focus of Snippets is on performing specific tasks in Pega not on the why other alternatives or providing explanation of the potential problems that one might encountered It also does not go into detailed explanation or discussion on the task topic In short the focus is on accomplishing the task Snippets are distributed as eBooks which not only provides the ability to share knowledge in a timely manner it also enables constant update of the knowledge
