**The British Seaborne Empire** Jeremy Black, Professor Jeremy Black, 2004-01-01 Britain's seaborne tradition is used to throw light on the British themselves the people with whom they came into contact and the British perception of empire The oceans and their shores rather than the mysterious interiors of continents certainly dominated the English perception of the transoceanic world in the sixteenth seventeenth and eighteenth centuries climaxing in the fascination with the Pacific in the age of Captain Cook and continuing into the nineteenth century with Franklin in the Arctic and Ross in the Antarctic The oceans offered much more than fascination In England from the late sixteenth century maritime conflict and imperial strength were seen as important to national morale and reputation and without it there would have been no empire or at least not in the form it actually took

Wilfrid Sellars Willem A. DeVries, 2014-12-18 Wilfrid Sellars 1912-89 has been called the most profound and systematic epistemological thinker of the twentieth century Robert Brandom He was in many respects ahead of his time and many of his innovations have become widely acknowledged for example his attack on the myth of the given his functionalist treatment of intentional states his proposal that psychological concepts are like theoretical concepts and his suggestion that attributions of knowledge locate the knower in the logical space of reasons However while many philosophers have begun to acknowledge Sellars's inspiration in their work their interpretation of his thought has not always been the most accurate His writings are difficult Individually his essays are complex and sometimes rely on doctrines and arguments he put forward elsewhere Each of his articles is deepened and strengthened by seeing it in its systematic context but he never wrote a unified exposition of his system which therefore has to be pieced together from numerous disparate sources Willem de Vries addresses these difficulties specifically and provides a careful reading and remarkable overview of Sellars's systematic philosophy that will become the standard point of reference for all philosophers seeking to understand Sellars's hugely significant body of work

**English Mechanic and World of Science**, 1875     *Collier's*, 1910     Brands and Their Companies, 1993     **The Greening of Antarctica** Alessandro Antonello, 2019. In *The Greening of Antarctica*, Alessandro Antonello investigates the development of an international regime of environmental protection and management between the signing of the Antarctic Treaty in 1959 and the signing of the Convention on the Conservation of Antarctic Marine Living Resources in 1980. In those two decades, the Antarctic Treaty parties and an international community of scientists reimagined what many considered a cold, sterile, and abiotic wilderness as a fragile and extensive regional ecosystem. Antonello investigates this change by analyzing the negotiations and developments surrounding four environmental agreements: the Agreed Measures for the Conservation of Antarctic Fauna and Flora in 1964, the Convention for the Conservation of Antarctic Seals in 1972, a voluntary restraint resolution on Antarctic mining in 1977, and the Convention on the Conservation of Antarctic Marine Living Resources in 1980. Though distant from world populations, Antarctica has long been a site of inter-state contest for geopolitical power and standing. This book reveals how a range of contests, geopolitical, epistemic, and imaginative, created the environmental protection regime of the Antarctic Treaty System and discusses the tension between states' individual searches for power and the collective desire for stability in the region. In this international and diplomatic context, the actors were not only trying to keep relations between themselves orderly but they were also using treaties to order the human relationship with the environment. Drawing on a wide range of international archives, many newly opened, *The Greening of Antarctica* offers the first detailed narrative of a crucial period in Antarctic history and reveals the contours of global environmental thought and diplomacy in the transformative Age of Ecology.
