## **Spiro Kostof The City Shaped:**

**The City Shaped** Spiro Kostof, 1999 The book is about the universal phenomenon of citymaking seen in a historical perspective how and why cities took the shape they did It focuses on a number of themes organic patterns the grid the city as a diagram the grand manner and the skyline and moves through time and place to interpret the hidden order inscribed in urban patterns *Culture, Urbanism and Planning* Manuel Guardia, 2016-05-13 The relationship between culture and urbanism has been the focus of much discussion and debate in recent years While globalisation tends towards a homogeneity successful global cities have a strong individual and particularly cultural identity The economic value of the culture of cities lies not only in the arts taking place there but also in the city's fabric its architecture and in its cultural heritage This volume brings together a team of leading specialists to examine the policies of image and city marketing which have developed over the past 15 years and whether these are a continuity of earlier strategies Featuring case studies which illustrate diverse perspectives on linking culture urbanism and history the book reviews heritage and planning culture looking at the experience of urbanism in the Old Historic City The book also assesses the increasingly important issue of urban images and their influence on planning strategies *The City Assembled* Spiro Kostof, Greg Castillo, 1992 Spiro Kostof the renowned architectural historian and chronicler of urban form presents a universal history of the elements of cities streets public places urban divisions and the borders of city and countryside This is both an independent study and a companion volume to Professor Kostof's book *The City Shaped* which dealt with cities as complete entities Now he follows the evolution of their components and traces the story right up to the present showing how the issues remain fresh and engage with our own day often in unexpected ways He also discusses urban process the effect on cities of natural disasters such as the Great Fire of London and the Lisbon earthquake war and comprehensive redevelopment compared with traditional patterns of incremental growth and change This is at once an exercise in architectural and social history a case study for the present and a pointer for the future *The City Assembled* Spiro Kostof, 1992 Kostof follows *The City Shaped* with a brilliant study of the component parts that make up urban life All cities consist of certain basic elements streets parks public places and boundaries and it is to these day to day pieces of urban experience that this book turns providing a fascinating understanding of walls fortifications placement of green space and the fringe areas where city and country meet Illustrations *Gridded Worlds: An Urban Anthology* Reuben Rose-Redwood, Liora Bigon, 2018-05-02 This book is the first edited collection to bring together classic and contemporary writings on the urban grid in a single volume The contributions showcased in this book examine the spatial histories of the grid from multiple perspectives in a variety of urban contexts They explore the grid as both an indigenous urban form and a colonial imposition a symbol of Confucian ideals and a spatial manifestation of the Protestant ethic a replicable model for real estate speculation within capitalist societies and a spatial framework for the design of socialist cities By examining the entangled histories of the grid *Gridded Worlds* considers the variegated

associations of gridded urban space with different political ideologies economic systems and cosmological orientations in comparative historical perspective In doing so this interdisciplinary anthology seeks to inspire new avenues of research on the past present and future of the gridded worlds of urban life Gridded Worlds is primarily tailored to scholars working in the fields of urban history world history urban historical geography architectural history urban design and the history of urban planning and it will also be of interest to art historians area studies scholars and the urban studies community more generally

**The Architecture of Urbanity** Vishaan Chakrabarti, 2024-09-24 From one of today's most inspired architects and urban advocates a manifesto for architecture as a force for addressing our biggest social challenges The world is facing unprecedented challenges from climate change and population growth to political division and technological dislocation to declining mental health and fraying cultural fabric With most of the planet's population now living in urban environments cities are the spaces where we have the greatest potential to confront and address these problems In this visionary book Vishaan Chakrabarti argues for an architecture of urbanity showing how the design of our communities can create a more equitable sustainable and joyous future for us all Taking readers from the great cities of antiquity to the worldwide exurban sprawl of our postindustrial age Chakrabarti examines architecture's relationship to history's greatest social technological and environmental dilemmas He then presents a rich selection of work by a global array of practicing architects demonstrating how innovative design can dramatically improve life in big cities and small settlements around the world from campuses and refugee camps to mega cities like S o Paulo Lima Los Angeles New York Paris and Tokyo Lavishly illustrated with a wealth of original graphics data visualizations photographs and drawings The Architecture of Urbanity eloquently explains why cities are the last best hope for humanity and why designers must alongside political business community and cultural leaders steward the healing of our planet

The Politics of Spatial Transgressions in the Arts Gregory Blair, Noa Bronstein, 2020-12-05 This book is an anthology of the varied strategies of spatial transgressions and how they have been implemented through the arts as a means to resist rejuvenate reclaim critique or cohabitate The book is divided into two sections Displacements and Disruptions The first section discusses the ramifications of the spatial displacements of bodies organizations groups of people and ethnicities and explores how artists theorists and arts organizations have an attentive history of revealing and reacting to the displacement of peoples and how their presence or absence radically reconfigures the value identity and uses of place In the second section each author considers how aesthetic strategies have been utilized to disrupt expected spatial experiences and logic Many of these strategies form radical alternative methodologies that include transgressions geographies of resistance and psychogeographies These spatial performances of disruption set into motion a critical exchange between the subject space and materiality in which ideology and experience are both produced spatialized and deconstructed destabilized

**The Largest Art** Brent D. Ryan, 2017-10-27 Why urban design is larger than architecture the foundational qualities of urban design examples and practitioners Urban design in practice is incremental but architects

imagine it as scaled up architecture large ready to build pop up cities This paradox of urban design is rarely addressed indeed urban design as a discipline lacks a theoretical foundation In *The Largest Art* Brent Ryan argues that urban design encompasses more than architecture and he provides a foundational theory of urban design beyond the architectural scale In a declaration of independence for urban design Ryan describes urban design as the largest of the building arts with qualities of its own Ryan distinguishes urban design from its sister arts by its pluralism plural scale ranging from an alleyway to a region plural time because it is deeply enmeshed in both history and the present plural property with many owners plural agents with many makers and plural form with a distributed quality that allows it to coexist with diverse elements of the city Ryan looks at three well known urban design projects through the lens of pluralism a Brancusi sculptural ensemble in Romania a Bronx housing project and a formally and spatially diverse grouping of projects in Ljubljana Slovenia He revisits the thought of three plural urbanists working between 1960 and 1980 David Crane Edmund Bacon and Kevin Lynch And he tells three design stories for the future imaginary scenarios of plural urbanism in locations around the world Ryan concludes his manifesto with three signal considerations urban designers must acknowledge eternal change inevitable incompleteness and flexible fidelity Cities are ceaselessly active perpetually changing It is the urban designer's task to make art with aesthetic qualities that can survive perpetual change

**The Guarded Age** David J. Betz, 2023-10-25 The fall of the Berlin Wall in 1989 came to symbolize the dawn of a new era of openness and connectivity Yet today the world is ever more divided demarcated and quite literally fortified We are living in a guarded age Why and how has this happened Where will it take us In this book David J Betz explores the expansion of fortified physical infrastructure at every level of the global political economy In cities where security is increasingly designed in to public buildings and spaces as they are reshaped to mitigate mass terror attacks Within corporations who are burying their electronic assets in deep underground caverns and behind the leaded walls of ex

nuclear war bunkers against a range of threats and feared contingencies In many urban areas where the default condition of civil life is to be walled gated watched and guarded Year after year hundreds of miles of linear obstacles walls ditches and watchtowers are added to national borders Practically everywhere you look there are signs of innovative fortification often designed to be overlooked The Guarded Age reveals the barriers which most have observed but few until reading this book have truly seen
