Auflage wurden die Kapitel zum Ausbau von VIP Flugzeugen sowie zum Safety Management neu aufgenommen Darüber hinaus wurde

das Kapitel zur EN 9100 deutlich erweitert und aktualisiert sowie der Musterzulassungsprozess transparenter gestaltet. Zudem wurde das Buch um einen Anhang mit den wichtigsten luftfahrttechnischen Gesetzen ergänzt. Zahlreiche Graphiken, Case Studies und Praxis Boxen unterstützen den Leser. *Diccionario Ingles Técnico Aeronáutico* Facundo Conforti, Augusto DeSantis, La industria aeroespacial es la segunda actividad más normada luego de las actividades nucleares. Esta regida por infinidad de normas, reglamentaciones, directivas, documentación específica y todo tipo de manuales de referencia obligatoria. La gran mayoría llega a manos de usuarios, operadores, talleristas etc. en idioma inglés es el idioma de uso aeronáutico por naturaleza. A ello se suma el hecho de que la industria aeronáutica no está aislada de las actividades humanas sino que interactúa y se nutre y hace su aporte a ellas creando la necesidad de un sólido vínculo interdisciplinario. Ahora bien si bien conocemos la existencia de esta necesidad de creación de un fuerte vínculo interdisciplinario también sabemos que en esta tarea nos encontramos con una gran barrera en el mismo la comunicación. A partir de esto es posible considerar varios impedimentos en esa barrera. Uno de los más importantes es el idioma como factor concurrente está el uso de regionalismos y como consecuencia de ellos la aplicación de jergas específicas. Desde los albores de la aviación hemos convivido con ese problema sucede que al incrementarse día a día el número de operaciones al crecer el parque aeronáutico y convertirse la aviación en una necesidad para el resto de las actividades humanas las condiciones inseguras, los incidentes y los accidentes continúan produciéndose quedando de manifiesto las falencias de la industria en ese aspecto. ii Las nuevas tecnologías en materiales, los nuevos métodos de diseño y los planes de mantenimiento con técnicas de inspección no destructivas han reducido los riesgos latentes de fallas técnicas pero no todos los aspectos relacionados con la vida humana pueden solucionarlos. La tecnología por lo que en paralelo con los desarrollos tecnológicos se han creado conceptos de gestión del factor humano que han contribuido en gran medida a la seguridad operacional y desde el año 1978 su estudio y prevención se ha expandido considerablemente por lo que en todos los programas de estudio y mejoramiento de la interacción antropológica CRM, MRM, LOFT, SHELL etc la comunicación es un vínculo importantísimo en la seguridad operacional. Si trasladamos lo expuesto a las tareas diarias ya sea en la operación de una aeronave, en el mantenimiento de la misma, en el control del tránsito aéreo, en la administración de las empresas operadoras o en cualquier otra actividad relacionada con la industria aeroespacial se presentará el problema del uso del idioma inglés, los regionalismos y las jergas específicas. Factores tendientes a desencadenar una sucesión de eventos inseguros que podrían desembocar en un incidente o en un accidente de consecuencias catastróficas. Cuando se analiza la comunicación oral y escrita es importante tener en cuenta que si bien manejamos un vocabulario técnico en común es inevitable tanto en inglés como en español el uso de regionalismos y argot, jargon en inglés. Por ejemplo un técnico ecuatoriano hablará de la bita cora de la aeronave mientras que uno argentino hablará de la libreta historial de la aeronave. Esta divergencia puede justificarse como un caso de regionalismos de países diferentes. Ahora bien en el segundo ejemplo el mismo técnico argentino en la provincia de Buenos

Aires hablara de chavetas para frenar un bulo n mientras que otro te cnico argentino en Co rdoba hablara de cupillas para frenar un bulo n En paralelo se puede ver tambie n que los diferentes fabricantes tienen le xicos especí ficos con res pecto a sus productos por ejemplo uno de los ma s conocidos fabricantes brita ni cos de motores posee un sistema propio de co dígos de denominacio n y aplicacio n de Boletines de Servicio no mandatorios muy distinto al que manejan sus compe tidores directos de Estados Unidos y Canada Por eso la intencio n de este manual iii es contemplar una cantidad importante de tales divergencias presenta ndolas en cada asiento especí fico para que el uso del te rmino y el concepto se apliquen con la mayor propiedad posible La propuesta de este manual es constituirse en una obra de referencia pensada como apoyo idioma tico para interpretar y utilizar con mayor exactitud todos los niveles en que se presenta la terminologi a aeronu tica y contribuir a la aclaracio n de las dudas que continuamente se dan en la traduccio n de ambas lenguas en los diferentes campos de la aviacio n

Competency-Based Education in Aviation Suzanne K. Kearns, Timothy J. Mavin, Steven Hodge, 2017-05-15

Whether a trainee is studying air traffic control piloting maintenance engineering or cabin crew they must complete a set number of training hours before being licensed or certified The aviation industry is moving away from an hours based to a competency based training system Within this approach training is complete when a learner can demonstrate competent performance Training based on competency is an increasingly popular approach in aviation It allows for an alternate means of compliance with international regulations which can result in shorter and more efficient training programs However there are also challenges with a competency based approach The definition of competency based education can be confusing training can be reductionist and artificially simplistic professional interpretation of written competencies can vary between individuals and this approach can have a high administrative and regulatory burden

Competency Based Education in Aviation Exploring Alternate Training Pathways explores this approach to training in great detail considering the four aviation professional groups of air traffic control pilots maintenance engineers and cabin crew Aviation training experts were interviewed and have contributed professional insights along with personal stories and anecdotes associated with competency based approaches in their fields Research based and practical strategies for the effective creation delivery and assessment of competency based education are described in detail
