Operations Research in Space and Air Tito A. Ciriani, G. Fasano, S. Gliozzi, Roberto Tadei, 2013-04-18 Operations Research in Space and Air is a selection of papers reflecting the experience and expertise of international OR consulting companies and academic groups The global market and competition play a crucial part in the decision making processes within the Space and Air industries and this book gives practical examples of how advanced applications can be used by Space and Air industry management The material within the book provides both the basic background for the novice modeler and a useful reference for experienced modelers Students researchers and OR practitioners will appreciate the details of the modeling techniques the processes that have been implemented and the computational results that demonstrate the benefits in applying OR in the Space and Airline industries Advances in PC and Workstations technology in optimization engines and in modeling techniques now enable solving problems never before attained by Operations Research In recent years the Italian OR Society AfRO www.airo.org has organized annual forums for researchers and practitioners to meet together to present and discuss the various scientific and technical OR achievements The OR in Space & Air session of AfRO2001 and AfRO2002 Conferences together with optimization tools applications presented recent results achieved by Alenia Spazio SpA Turin Alitalia Milan Polytechnic and Turin Polytechnic With additional contributions from academia and industry they have enabled us to capture in print today's state of the art optimization and data mining solutions *Spreadsheet Modeling and Decision Analysis* Cliff T. Ragsdale, 2006 *Selected Material from Spreadsheet Modeling and Decision Analysis* Cliff T. Ragsdale, 2000 **Journal of Economic Literature**, 2001 *Optimization Modeling with Spreadsheets* Kenneth R. Baker, 2012-01-10 Reflects the latest applied research and features state of the art software for building and solving spreadsheet optimization models Thoroughly updated to reflect the latest topical and technical advances in the field *Optimization Modeling with Spreadsheets* Second Edition continues to focus on solving real world optimization problems through the creation of mathematical models and the use of spreadsheets to represent and analyze those models Developed and extensively classroom tested by the author the book features a systematic approach that equips readers with the skills to apply optimization tools effectively without the need to rely on specialized algorithms This new edition uses the powerful software package Risk Solver Platform RSP for optimization including its Evolutionary Solver which employs many recently developed ideas for heuristic programming The author provides expanded coverage of integer programming and discusses linear and nonlinear programming using a systematic approach that emphasizes the use of spreadsheet based optimization tools The Second Edition also features Classifications for the various problem types providing the reader with a broad framework for building and recognizing optimization models Network models that allow for a more general form of mass balance A systematic introduction to Data Envelopment Analysis DEA The identification of qualitative patterns in order to meaningfully interpret linear programming solutions An introduction to stochastic programming and the use of RSP to solve

problems of this type Additional examples exercises and cases have been included throughout allowing readers to test their comprehension of the material In addition a related website features Microsoft Office Excel files to accompany the figures and data sets in the book With its accessible and comprehensive presentation Optimization Modeling with Spreadsheets Second Edition is an excellent book for courses on deterministic models optimization and spreadsheet modeling at the upper undergraduate and graduate levels The book can also serve as a reference for researchers practitioners and consultants working in business engineering operations research and management science
