Bernd van der Meulen,2023-09-04 Since the turn of the Millennium world wide initiatives from the private sector have turned
the regulatory environment for food businesses upside down For the first time in legal literature this book analyses private
law initiatives relating to the food chain often referred to as private voluntary standards or schemes Private standards are
used to remedy flaws in legislation in order to reach higher levels of consumer protection than the ones chosen by the EU
legislature and to manage risks and liability beyond the traditional limits of food businesses We see that litigation is no
longer solely framed by legislative requirements but ever more by private standards such as GlobalGAP BRC IFS SQF and
ISO These private standards incorporate public law requirements thus embedding them in contractual relations and
exporting them beyond the jurisdiction of public legislators Other standards focus on corporate social responsibility or
sustainability This book also addresses how private religious standards such as Kosher and Halal play a role in defining
specific markets of growing importance It is noted that organic standards have found an interesting symbioses with public
law Another development on this topic is that food businesses are inspected more often by private auditors than by public
inspectors Effects in terms of receiving or being denied certification far outweigh public law sanctions In short private law
has changed an entire legal infrastructure for the food sector It emerges as competing with the public law regulatory
infrastructure This book is of interest to all who concern themselves with food law legislation and litigation and the evolving
role of private standards on changing the landscape of food chains and innovation **SEC Docket** United States. Securities
