DEADHOLD BDC RETICLE

Welcome to the BDC reticle user's guide. This exclusive reticle was designed to eliminate the need for guessing hold-over at various distances. By selecting the appropriate sub-crosshair dot, a shooter will be able to hold "dead-on" his target at all reasonable distances. The BDC reticle is very versatile; use it effectively with a variety of firearms, including high powered rifles, rimfire rifles, black powder rifles and slug shotguns.

Notes: To effectively use the BDC reticle for long distance shooting, an accurate laser rangefinder becomes a "must have" piece of equipment.

Proper Mounting

Be sure to consult the standard owners manual for proper scope mounting techniques. To get the most out of your BDC riflescope, it's very important that your scope be mounted correctly. In particular, pay attention to getting the crosshairs exactly vertical.

Firearm Ballistics Classification

To effectively use the BDC reticle, you must first classify the type of firearm you are using. Most popular firearm choices fall ballistically into one of the following classes. *If your firearm doesn't fall exactly into one of the following classes, select the class which is ballistically closest, or contact Vortex if you need guidance.*
