

Voyage Century

The image is a composite graphic. In the background, a large sailing ship with white sails is visible on a dark, choppy sea. The sky is a mix of dark and light blue, suggesting a storm or a dramatic sunset/sunrise. In the foreground, a massive, dark, metallic structure, possibly a giant's hand or a mechanical arm, is reaching out towards the ship. The structure has a complex, industrial design with many rivets and bolts. The title "Voyage Century" is written in a large, stylized, blue font with a white outline, positioned in the center of the image. The overall mood is adventurous and epic.

Novel Environments Jayne Hildebrand, 2023-05-31 The environment concept has shaped humanity s relationship to the natural world and has drawn attention to the effects of human actions on our natural surroundings But when did we learn that we live in an environment While scholars have often located the emergence of the environment concept in twentieth century ecological and political thought *Novel Environments* Science Description and Victorian Fiction reconstructs a longer and a specifically literary history It was in the descriptive worldmaking of the Victorian novel that the environment was first transformed from an abstraction into a vivid object of imagination and feeling Engaging the scientific theories of their contemporaries Mary Russell Mitford George Eliot Thomas Hardy and Robert Louis Stevenson turned to detailed description from gardens and landscapes to weather and atmospheres to model interactions between life and its surroundings Far from merely furnishing static background the descriptive apparatus of the Victorian novel imagined the nonhuman environment as dynamically involved with human action feeling and development In making this argument *Novel Environments* recovers the scientific vocabulary the Victorians used to name the surroundings of living organisms The word environment dominates our own way of speaking about the nonhuman world but nineteenth century scientific writers and novelists availed themselves of a richer conceptual lexicon which included environment along with less familiar concepts such as milieu medium and circumstance Jayne Hildebrand traces the development of Victorian environmental thought from the earliest theorization of physical surroundings as a dynamic influence in the life sciences through the idea of a singular medium in mid century organicism to the conception of the planet as an environmental system at the fin de si cle By showing how novelistic description helped to produce the modern environment concept Hildebrand sheds new light on the relationship between Victorian literature and the life sciences and reveals how literary form has shaped the ecological ideas through which we apprehend the nonhuman world
