role of individual differences in young learners can contribute both to SLA theories and to evidence based L2 education This book discusses recent findings concerning the role of individual differences in language learning in young learners The chapters in the book concern different topics linked to internal individual differences such as language aptitude motivation attitude and external individual differences such as exposure and type of instruction the relative contribution of internal and external factors to language learning and the interplay between the two types of individual differences Morphologically complex words in the mind/brain Alina Leminen,Harald Clahsen,Minna Lehtonen,Mirjana Bozic,2016-04-07 The question of how morphologically complex words assigned are represented and processed in the brain has been one of the most hotly debated topics in the cognitive neuroscience of language Do complex words engage cortical representations and processes equivalent to single lexical objects or are they processed as sequences of separate morpheme like units Research on morphological processing has suggested that adults make efficient use of both lexical i e whole word storage and retrieval as well as combinatorial computation in processing morphologically complex words Psycholinguistic studies have demonstrated that processing of complex words can be affected both by properties of the morphemes and the whole words such as their frequency transparency and regularity Furthermore this research has been informative about the time course of complex word recognition and production and the role of morphological structure in these processes At the neural level left hemisphere inferior frontal and superior temporal areas and negative going event related potentials have been consistently associated with morphological processing While most previous research has been done on the recognition of morphologically complex words in adult native speakers much less is known about neurocognitive processes involved in the on line production of morphologically complex words and even less on morphological processing in children and non native speakers Moreover we have limited understanding of how linguistically distinct morphological processes e g inflectional assigned versus derivational assigned are handled by the cortical language networks This e book provides an up to date overview of the questions currently addressed in the field of morphological processing It highlights the significance of morphological information in language processing both written and spoken as assessed by a variety of methods and approaches It also provides a comprehensive range of research and development tools for the development of new technologies *Party Status to Armed Conflict in International Law* Alexander Wentker,2024-06-26 The question of what constitutes an armed conflict has featured prominently in international law debates However international lawyers have paid less attention to the inextricable question of who is engaged in a conflict focusing solely on whether there is an armed conflict Against this backdrop Alexander Wentker's *Party Status to Armed Conflict in International Law* explores why it matters and how it is established that a State international organization or armed group is a party to an armed conflict The first part of the book demonstrates that party status is central at all levels of the international legal regulation of armed conflicts with parties to armed conflict being both key addressees of international law and central reference points for regulating individuals and third parties In

response to increasingly widespread cooperation practices the book's second part advances an analytical framework for identifying parties to conflicts with multiple parties on the same side or co-parties. *Party Status to Armed Conflict in International Law* is aimed at academics, students and practitioners seeking to understand how armed conflicts are legally regulated. It presents readers with a refined account of how responsibilities are allocated in armed conflicts, enabling deeper insight into how international law can best respond to the realities of contemporary conflicts.
