lush agricultural farmland of the Imperial Valley and the austere desert called America's Sahara. The sea sits near the boundary between the United States and Mexico and lies at the often contested intersections of the sovereign lands of the Torres Martinez Desert Cahuilla and the state of California. Created in 1905 when overflow from the Colorado River combined with a poorly constructed irrigation system to cause the whole river to flow into the desert, this human-maintained body of water has been considered a looming environmental disaster. The Salton Sea's very precariousness, the way it sits uncomfortably between worlds existing always in the interstices of human and natural influences between desert and wetland, between the skyward pull of the sun and the constant inflow of polluted water, is both a symptom and symbol of the larger precariousness of settler relationships to the environment in the West and beyond. Voyles provides an innovative exploration of the Salton Sea, looking to the ways the sea, its origins and its role in human life, have been vital to the people who call this region home.
