

Study Guide for the Spring Semester Final Biology

Final: The semester final will count for 20% of your semester test average. It will be 100-150 multiple choice questions.

Note Card: For the final, you will be allowed one 4x6 index card as a notes sheet. The dimensions of the card must not exceed 4x6 and the card **MUST** be turned in at the end of the final with your name on it. All material on the card **must be handwritten**. Failure to turn in your note card (if you used one during the final) will result in a **minimum loss of 10%** of your final exam score.

Disclaimer: The majority of the topics covered on the semester final have been listed, but this is not comprehensive. Anything we have covered this semester in lecture, reading, handouts, labs, etc. is fair game for the final. This list just indicates those topics I believe that the majority of students need to review. Anything not covered in class will not appear on the final. If you have any doubts, please ask; don't just assume you won't see it.

Topics covered in class: Chapters 8,9,10,11,12,14,15 (photosynthesis, respiration, DNA and RNA; Genetics; Evolution (some));

Review Questions: The following questions need to be answered on a separate piece of paper and will be collected for credit.

Chapter 8

1. Review photosynthesis. What is the formula for photosynthesis? What are the reactants (what goes in) and products (what comes out) of both reactions? Where do the products then go?
2. What is ATP? What does it do? How is energy released from ATP?
3. What is a pigment? Why do leaves of a plant appear green?
4. Describe an experiment that we performed while studying photosynthesis.

Chapter 9

5. Define the following: anaerobic respiration, aerobic respiration, fermentation, lactic acid fermentation, alcoholic fermentation.
6. Review cellular respiration. What is the formula for cellular respiration? What are the steps in order of cellular respiration? What are the reactants (what goes in) and products (what comes out) of cellular respiration? Where do the products then go?

courses as well as to the ongoing discussions in mathematics education regarding the role importance of conceptual understanding and how to promote it The study makes visible some of the ways in which students post secondary experiences with mathematics are shaped by their perception of their mathematical preparation thus providing a basis for discussions of possible curricular change in the Bahamas It also suggests that issues such as confidence and school teacher expectations of students may play a role in the development of conceptual understanding
