

Gas – Heritage gas heaters

All Victorians with a Vulcan Heritage or a Pyrox Heritage gas space heater in their home need to get them serviced by a qualified gasfitter immediately.

Laboratory tests show that open flue heaters such as the Heritage may, under certain operating conditions, produce too much carbon monoxide if they are not properly installed and maintained. All Victorians with a Vulcan Heritage or a Pyrox Heritage gas space heater in their home must have them serviced by a qualified gasfitter immediately.

The combination of inadequate ventilation as well as operating bathroom exhaust fans or kitchen range hoods at the same time as the heater can draw carbon monoxide into living areas. The risk is increased if the heaters and associated components such as the flue are not regularly serviced.
