Vut Application Form 2015:

Enhancing Quality in Higher Education Ray Land, George Gordon, 2013-06-19 Interest in the quality of higher education provision has been steadily increasing over the last twenty years This has been driven largely by the international creation of explicit policies and reporting requirements to review audit and evaluate provision The interest is associated in many countries with the granting by governments of greater autonomy to higher education institutions This crucially comes bound with increased requirements for accountability in the exercise of such power Enhancing provision promoting innovation cultivating exploration and adopting information led approaches to practice are at the very heart of higher education As such quality enhancement comes in many guises and is under constant scrutiny Enhancing Quality in Higher Education looks critically at recent developments in higher education taking snapshots of changing practices around the world and analysing the varied theoretical perspectives of quality enhancement that are emerging The opening section draws upon this theoretical base whilst the second section contextualises it through the analysis of a diverse range of international case studies The concluding section considers future prospects for the enhancement agenda in the light of the international pressures facing all systems of higher education in the future Policy will inevitably be shaped by the historical contexts within which national systems are located The book draws on a wide range of international case studies examined by a host of contributing experts The movement towards quality enhancement can be seen as stimulating action at the grassroots of the academy to self generate improvement It is a counter to the prevalent view that change in higher education is essentially about the institutional response to increasing societal pressure and state control and as such is a welcome contribution to the literature This comprehensive volume is essential reading for anyone involved in higher education and educational policy

Gender Violence & Human Rights Aletta Biersack, Margaret Jolly, Martha Macintyre, 2016-12-14 The postcolonial states of Fiji Papua New Guinea and Vanuatu operate today in a global arena in which human rights are widely accepted As ratifiers of UN treaties such as the Convention on the Elimination of All Forms of Discrimination against Women and the Convention on the Rights of the Child these Pacific Island countries have committed to promoting women s and girls rights including the right to a life free of violence Yet local national and regional gender values are not always consistent with the principles of gender equality and women s rights that undergird these globalising conventions This volume critically interrogates the relation between gender violence and human rights as these three countries and their communities and citizens engage with appropriate modify and at times resist human rights principles and their implications for gender violence Grounded in extensive anthropological historical and legal research the volume should prove a crucial resource for the many scholars policymakers and activists who are concerned about the urgent and ubiquitous problem of gender violence in the western Pacific This is an important and timely collection that is central to the major and contentious issues in the contemporary Pacific of gender violence and human rights It builds upon existing literature but the contributors to this volume interrogate

the connection between these two areas deeply and more critically This book should and must reach a broad audience Jacqui Leckie Associate Professor Anthropology and Archaeology University of Otago The volume addresses the tensions between human and cultural individual and collective rights as played out in the domain of gender Gender is a perfect lens for exploring these tensions because cultural rights are often claimed in defence of gender oppression and because women often have imposed upon them the burden of representing cultural traditions in attire comportment restraint or putatively cultural conservatism And Melanesia is a perfect place to consider these gendered issues because of the long history of ethnocentric representations of the region because of the extent to which these are played out between states and local cultures and because of the efforts of the vibrant women s movements in the region to develop locally workable responses to the problems of gender violence in these communities Christine Dureau Senior Lecturer Anthropology University of Auckland

Modified Nanomaterials for Environmental Applications Onoyivwe Monday Ama, Suprakas Sinha Ray, Peter Ogbemudia Osifo, 2021-11-16 This book focuses on the electrochemical and nanostructural properties of new photoanode electrolyte combinations used in the development of novel surface modified nanomaterials for environmental applications As water treatment is rapidly becoming a global challenge due to the increasing complexity and number of the various pollutants present the book explores fundamental issues relating to environmental applications of nanomaterials It addresses relevant topics ranging from electrochemical synthesis and characterization to applications of photoanodes in corrosion prevention and biosensors for wastewater treatment Featuring up to date experimental results on nanomaterials for detection of pharmaceuticals and heavy metals in wastewater this contributed volume is useful to electrochemical researchers materials scientists and chemical and civil engineers interested in advanced photoelectrochemical research for environmental applications

The Un Convention on the Elimination of All Forms of Discrimination Against Women and Its Optional Protocol Patricia Schulz, Ruth Halperin-Kaddari, Beate Rudolf, Marsha A. Freeman, 2023-01-27 This volume is the fully revised and updated version of the first comprehensive commentary on the Convention on the Elimination of All Forms of Discrimination against Women and its Optional Protocol It reflects the developments during the decade following the publication of the first edition in 2012 which has also seen a notable rise in individual complaints more than 85 ten new General Recommendations and six new inquiry procedures as well as numerous statements partly in conjunction with other UN human rights bodies The Convention is a key international human rights instrument and the only one exclusively addressed to women It has been described as the United Nations landmark treaty in the struggle for women s rights At a time when the backlash against women s human rights and the concept of gender based discrimination is increasingly challenged by governments and powerful societal actors the Commentary is an important instrument to hold all state powers to account on their international obligations under the Convention The Commentary analyses the interpretation of the Convention through the work of its monitoring body the Committee on the Elimination of Discrimination against Women It

comprises detailed analyses of the Preamble and each article of the Convention and of the Optional Protocol including a separate chapter on the cross cutting substantive issue of violence against women The sources relied on are the treaty language and the general recommendations concluding observations and case law under the Optional Protocol individual complaints and inquiries through which the Committee has interpreted and applied the Convention Each chapter is self contained but the Commentary is conceived of as an integral whole The book also includes an introduction which provides an overview of the Convention and its embedding in the international law of human rights as well as the most recent challenges to women s human rights worldwide

Redefining Education and Development Kaitano Dube,2024-10-18 The book aligns with the United Nations Sustainable Development Goals SDGs particularly Goal 4 which focuses on quality education It explores the evolving role of education as a critical driver for achieving all 17 SDGs by providing a platform for discussing innovative educational models and theories that foster sustainable development The book takes an interdisciplinary approach merging educational theory developmental practice and human psychology to address complex global challenges hindering sustainable development The book includes case studies and empirical research such as exploring student entrepreneurship in the agricultural sector and the factors bridging the gap between entrepreneurial intention and venture creation These examples provide readers with practical applications of theoretical concepts and demonstrate the real world impact of educational innovations which is at the core of education delivery for all and how education touches on other areas of the SDGs The book offers valuable insights for policymakers educators and development practitioners by presenting research and theory based analyses It suggests ways to improve the academic environment to foster entrepreneurship and innovation which are key to economic development and job creation especially in regions with high youth unemployment rates The content suggests educational reforms that are responsive to the changing societal and economic landscapes The book s blend of theory and practice targets a broad audience including academic scholars students development agencies non governmental organisations and policymakers It seeks to engage these diverse readers in a conversation about the future of education and its role in achieving sustainable development In summary the book seeks to provide a comprehensive exploration of the nexus between education development and human needs in the context of the SDGs offering innovative perspectives and practical solutions to equip readers to contribute to sustainable global development

An Introduction to Formal Languages and Automata
Linz, 2016-01-15 Data Structures Theory of Computation *Photons In Fock Space And Beyond (In 3 Volumes)* Reinhard Honegger, Alfred Rieckers, 2015-04-22 The three volume major reference Photons in Fock Space and Beyond undertakes a new mathematical and conceptual foundation of the theory of light emphasizing mesoscopic radiation systems The quantum optical notions are generalized beyond Fock representations where the richness of an infinite dimensional quantum field system with its mathematical difficulties and theoretical possibilities is fully taken into account It aims at a microscopic formulation of a mesoscopic model class which covers in principle all stages of the generation and propagation of light within a unified and well defined conceptual frame The dynamics of the interacting systems is founded according to original works of the authors on convergent perturbation series and describes the developments of the quantized microscopic as well as the classical collective degrees of freedom at the same time The achieved theoretical unification fits especially to laser and microwave applications inheriting objective information over quantum noise A special advancement is the incorporation of arbitrary multiply connected cavities where ideal conductor boundary conditions are imposed From there arises a new category of classical and quantized field parts apparently not treated in Quantum Electrodynamics before In combination with gauge theory the additional cohomological fields explain topological quantum effects in superconductivity Further applications are to be expected for optoelectronic and optomechanical systems **Boredom: The Elephant in the Room**

Doris Sommer, Robert D. Austin, Alexandra Vuyk, David M. Ndeti, Nicolas Prevelakis, Pier Luigi Sacco, Josefa Ros Velasco, 2024-07-16 When cases of domestic violence spiked during the COVID 19 lockdowns terror spread among potential victims while governments that enforced the isolation seemed helpless to address the damages Vulnerable partners children and parents were hostage to possible perpetrators given the risks of retaliation at home and the danger of death by contamination in shelters The alarm raises questions about under examined triggers for violence against others and oneself One common trigger is boredom It is the elephant in the room a known stressor in institutional settings schools prisons and military installations and otherwise out of focus despite the ubiquity of gender based violence Detecting the ravages of boredom in apparently safe domestic settings hints at a range of meanings for the word and a web of personal and collective dysfunctions including anxiety depression feelings of worthlessness and anomie Conventional remedies for these challenges do not address the escalating rates of violence to oneself and to others Their evident ineffectiveness during the crisis laid bare structural flaws in standard human development strategies which span home and school environments the law and

approaches to mental health A major flaw has been the narrow perspectives of one or another discipline when the dangers are interrelated and demand multidisciplinary approaches Chronic violence and alarming rates of depression before during and after the pandemic show failures of predictable perspectives and their recommendations even in normal conditions The question of how authorities should react to harm done begs the question of how to prevent harm from happening Prevention rather than punishment for crimes or treatment for pathologies has become a preferred approach for both legal and clinical interventions To stop violence before it erupts requires investigation into its causes because treating the effects of aggression evacuating victims punishing perpetrators counselling patients addresses symptoms rather than diseases Why was the lockdown a time of increased domestic violence What accounts for recent spikes in teen suicides What are the existing and possible tools for measuring boredom Answers from experts stay within foreseeable observations about the loss of jobs the increase of alcoholism social media addiction and psychological stress These familiar answers do not lead beyond the description of pathological patterns But different approaches may follow from attending to the under examined danger of having nothing to do

Labour Law in the Netherlands Antoine T.J.M. Jacobs, 2020-05-21 Derived from the renowned multi volume International Encyclopaedia of Laws this monograph on the Netherlands not only describes and analyses the legal aspects of labour relations but also examines labour relations practices and developing trends It provides a survey of the subject that is both usefully brief and sufficiently detailed to answer most questions likely to arise in any pertinent legal setting Both individual and collective labour relations are covered in ample detail with attention to such underlying and pervasive factors as employment contracts suspension of the contracts dismissal laws and covenant of non competition as well as international private law The author describes all important details of the law governing hours and wages benefits intellectual property implications trade union activity employers associations workers participation collective bargaining industrial disputes and much more Building on a clear overview of labour law and labour relations the book offers practical guidance on which sound preliminary decisions may be based It will find a ready readership among lawyers representing parties with interests in the Netherlands and academics and researchers will appreciate its value in the study of comparative trends in laws affecting labour and labour relations

Cross-Lingual Word Embeddings Anders Søgaard, Ivan Vulić, Sebastian Ruder, Manaal Faruqi, 2022-05-31 The majority of natural language processing NLP is English language processing and while there is good language technology support for standard varieties of English support for Albanian Burmese or Cebuano and most other languages remains limited Being able to bridge this digital divide is important for scientific and democratic reasons but also represents an enormous growth potential A key challenge for this to happen is learning to align basic meaning bearing units of different languages In this book the authors survey and discuss recent and historical work on supervised and unsupervised learning of such alignments Specifically the book focuses on so called cross lingual word embeddings The survey is intended to be systematic using consistent notation and putting the available methods

on comparable form making it easy to compare wildly different approaches In so doing the authors establish previously unreported relations between these methods and are able to present a fast growing literature in a very compact way Furthermore the authors discuss how best to evaluate cross lingual word embedding methods and survey the resources available for students and researchers interested in this topic **Guide to SSC - CHSL (10+2) DEO, LDC & Postal/ Sorting Assistant Exam with Previous Year Questions & 3 Online Practice Sets 9th Edition | Combined Higher Secondary Level | Staff Selection Commission | PYQ | Mock Test** , The latest and updated 9th edition of the book SSC CHSL 10 2 Guide for DEO LDC Postal Sorting Assistant Online Exam contains Comprehensive Concept Review sections on Quantitative Aptitude General Intelligence Reasoning Verbal Non Verbal English Language and General Awareness Detailed discussion of each topic along with solved examples It is followed by a practice exercise with detailed solutions The book contains the past 5 year papers from 2015 2021 included chapter wise with detailed Solutions The General Awareness section has been updated with latest current affairs MCQ s The book also provides 3 Online Practice Sets on latest pattern **Guide to SSC - CHSL (10+2) DEO, LDC & Postal/ Sorting Assistant Exam Tier I & II with Previous Year Questions 11th Edition | Combined Higher Secondary Level | PYQ | Mock Test** Disha Experts, The latest and updated 11th edition of the book SSC CHSL 10 2 Guide for DEO LDC Postal Sorting Assistant Online Exam contains The Book includes 59 Chapters in Quantitative Aptitude 15 General Intelligence Reasoning 22 English Language 14 Computers 1 and General Awareness 7 Detailed discussion of each topic along with solved examples It is followed by a practice exercise with detailed solutions The book contains the past 6 year papers from 2015 2024 included chapter wise with detailed Solutions The General Awareness section has been updated with latest current affairs MCQ s **The Analyst** ,1876 The Analyst publishes research articles in pure mathematics **Mathematical Methods in Engineering** Joseph M. Powers,Mihir Sen,2015-01-26 Designed for engineering graduate students this book connects basic mathematics to a variety of methods used in engineering problems **Entrepreneurship, Self-Employment and Retirement** N. Sappleton,F. Lourenco,2015-04-16 This book presents a collection of nine studies which contribute to a more robust and richer understanding of entrepreneurship self employment and retirement in a diversity of settings including the Netherlands Canada the United Kingdom Singapore and the US by drawing on both qualitative and quantitative data **Local Homotopy Theory** John F. Jardine,2015-05-27 This monograph on the homotopy theory of topologized diagrams of spaces and spectra gives an expert account of a subject at the foundation of motivic homotopy theory and the theory of topological modular forms in stable homotopy theory Beginning with an introduction to the homotopy theory of simplicial sets and topos theory the book covers core topics such as the unstable homotopy theory of simplicial presheaves and sheaves localized theories cocycles descent theory non abelian cohomology stacks and local stable homotopy theory A detailed treatment of the formalism of the subject is interwoven with explanations of the motivation development and nuances of ideas and results The coherence of the abstract theory is elucidated through

the use of widely applicable tools such as Barr's theorem on Boolean localization model structures on the category of simplicial presheaves on a site and cocycle categories. A wealth of concrete examples convey the vitality and importance of the subject in topology, number theory, algebraic geometry, and algebraic K-theory. Assuming basic knowledge of algebraic geometry and homotopy theory, *Local Homotopy Theory* will appeal to researchers and advanced graduate students seeking to understand and advance the applications of homotopy theory in multiple areas of mathematics and the mathematical sciences.

The Princeton Companion to Applied Mathematics Nicholas J. Higham, Mark R. Dennis, Paul Glendinning, Paul A. Martin, Fadil Santosa, Jared Tanner, 2015-09-15. This must-have compendium on applied mathematics is the most authoritative and accessible single-volume reference book on applied mathematics. Featuring numerous entries by leading experts and organized thematically, it introduces readers to applied mathematics and its uses, explains key concepts, describes important equations, laws, and functions, looks at exciting areas of research, covers modeling and simulation, explores areas of application, and more. Modeled on the popular *Princeton Companion to Mathematics*, this volume is an indispensable resource for undergraduate and graduate students, researchers, and practitioners in other disciplines seeking a user-friendly reference book on applied mathematics. Features nearly 200 entries organized thematically and written by an international team of distinguished contributors. Presents the major ideas and branches of applied mathematics in a clear and accessible way. Explains important mathematical concepts, methods, equations, and applications. Introduces the language of applied mathematics and the goals of applied mathematical research. Gives a wide range of examples of mathematical modeling. Covers continuum mechanics, dynamical systems, numerical analysis, discrete and combinatorial mathematics, mathematical physics, and much more. Explores the connections between applied mathematics and other disciplines. Includes suggestions for further reading, cross-references, and a comprehensive index.

Advances in Operations Research Education Jeroen Beliën, Ana Paula Teixeira, Hans W. Ittmann, João Luís de Miranda, Marco Laumanns, Margarida Vaz Pato, 2018-02-16. This edited monograph contains a comprehensive overview of educational developments in the fields of operations research (OR) and management science (MS). The book outlines key factors in OR/MS curricular programs and analyses different approaches regarding student enrollment and failure rates. The approach is genuinely international, whereas the focus lies on the European level. The target audience primarily comprises public policy planners in education, deans, and school directors, as well as program coordinators.

Dynamics of Quasi-Stable Dissipative Systems Igor Chueshov, 2015-09-29. This book is devoted to background material and recently developed mathematical methods in the study of infinite-dimensional dissipative systems. The theory of such systems is motivated by the long-term goal to establish rigorous mathematical models for turbulent and chaotic phenomena. The aim here is to offer general methods and abstract results pertaining to fundamental dynamical systems properties related to dissipative long-time behavior. The book systematically presents, develops, and uses the quasi-stability method while substantially extending it by including for

consideration new classes of models and PDE systems arising in Continuum Mechanics The book can be used as a textbook in dissipative dynamics at the graduate level Igor Chueshov is a Professor of Mathematics at Karazin Kharkov National University in Kharkov Ukraine
