

Introduction to the AP[®] Chemistry Multiple Choice Questions (MCQ's)

with Tyler DeWitt

A lot of students feel that the MCQ's are the hardest part of the AP Chemistry test. And that makes sense, because the multiple choice questions on the AP exam are not like the kind of easy "free points" multiple choice questions you've probably run into on most exams in the past.

These MCQ's require you to combine multiple concepts to answer one question. In many cases, you're given information you've never seen before, and you have to think through a series of steps—like solving a puzzle—in order to get to the right answer.

So what are these MCQ's actually like? I wrote a collection of AP-style questions to show you. They might be harder than you're expecting. That's OK. In the video (link and QR code below) we'll work through each one, and we'll talk about strategies and tips for attacking these difficult questions.

For in-depth explanations, strategies, and tips videos for each question, check out: <https://youtu.be/4XAoHfLi8CI>
