National Audit Office,2013 This report concludes that the Department for Work and Pensions has not achieved value for money in its early implementation of Universal Credit The Department was overly ambitious in both the timetable and scope of the programme took risks to try to meet the short timescale and used a new project management approach which it had never before used on a programme of this size and complexity It was unable to explain how it originally decided on its ambitious plans or evaluated their feasibility Nor did it have any adequate measures of progress Over 70 per cent of the 425 million spent to date has been on IT systems and 34 million of its new IT systems has been written off The existing systems offer limited functionality the current IT system lacks a component to identify potentially fraudulent claims so that the Department has to rely on multiple manual checks on claims and payments Problems with the IT system have delayed national roll out of the programme which will reduce the expected benefits of reform and if the 2017 completion date remains increase risks by requiring the rapid migration of a large volume of claimants The source of many problems has been the absence of a detailed view of how Universal Credit is meant to work In addition poor control and decision making undermined confidence in the programme and contributed to a lack of progress The Department has particularly lacked IT expertise and experienced frequent changes in senior management *Monthly Catalog of United States Government Publications, Cumulative Index* United States. to provide a critical analysis of both political and professional developments in policy and practice relating to non custodial penalties taking full account of recent developments and the creation of a National Probation Service in 2002 Its aim is to unravel the complex institutional goals the role of community punishment in the criminal justice system professional goals what can be achieved by community punishment and political goals the packaging and sale of community punishment to the law abiding public The central focus is on principles and politics of community punishment and on the changing role of the probation service *House of Commons - Committee of Public Accounts: Universal Credit: Early Progress - HC 619* Great Britain: Parliament: House of Commons: Committee of Public Accounts,2013-11-07 Universal Credit is the DWP s single biggest programme and enjoys cross party support yet its implementation has been extraordinarily poor The failure to develop a comprehensive plan has led to extensive delay and the waste of a yet to be determined amount of public money 425 million has been spent so far on the programme It is likely that much of this including at least 140 million worth of IT assets will now have to be written off Lack of day to day control meant early warning signs were missed with senior managers becoming aware of problems only through ad hoc reviews Pressure to deliver a programme of this magnitude within such an ambitious timescale created a fortress culture where only good news was reported and problems were denied There has been a shocking absence of control over suppliers with the Department failing to implement the most basic procedures for monitoring and authorising expenditure The pilot programme is not a proper pilot Its scope is limited and does not deal with the key issues that Universal Credit must address the volume of claims their complexity change in claimants circumstances and the need for claimants to meet conditions for continuing entitlement to benefit The programme will not hit its current target of enrolling 184 000 claimants by April 2014 The Department will have to speed up the later stages of the programme if it is to meet the 2017 completion date but that will pose new risks Meeting any specific timetable from now on is less important than delivering the programme successfully **Ranger Handbook: TC 3-21.76 (April 2017 Edition)**

Stopping The Violence: A Group Model To Change Men'S Abusive Att...Workbook David J Decker,2013-04-03 This informative and helpful guide will assist your clients in making positive strides toward a nonviolent life Some of the tips and suggestions that are further explained in this workbook include Acknowledge to yourself and to others that you have a problem with anger abuse and control Address mental health and chemical use issues if they are present in your life Come to know that when you become abusive you are always feeling inadequate powerless and unlovable Realize that controlling and abusive behavior hurts you and those you love Understand that anger is different from abuse and control Recognize that becoming abusive is always a choice Instead of blaming others take responsibility for what you feel how you think and how you act Accept that you cannot control or change other people Remember that you can always take a time out Think about the possible consequences before you become controlling and abusive Identify what triggers your anger and your abusive

and controlling attitudes and behaviors Notice what you are thinking Your thoughts can increase your escalation or calm you down Become aware of all your feelings not just your anger and learn to respectfully communicate them to others Turn conflicts into positive problem solving opportunities Control abuse and violence are learned Think about the messages you received from your family and from society about what it is to be a man Redefine manhood as nonviolent and nonabusive Take the risk to count on other men for emotional support Learn to feel a genuine sense of pride by taking control of how you view the world and how you act Start to believe that you can truly change the controlling and abusive parts of who you have been

Urban and Regional Development Trajectories in Contemporary Capitalism Flavia Martinelli, Frank

Moulaert, Andreas Novy, 2013-03-22 This book re evaluates a rich scientific heritage of space and history sensitive development theories and produces an integrated methodology for the comparative analysis of urban and regional trajectories within a globalized world The main argument put forward is that current mainstream analyses of urban and regional development have forgotten this rich heritage and fail to address the connections between different dimensions of development the role of history and the importance of place and scale relations The proposed methodology integrates elements from different theories radical economic geography regulation approach cultural political economy old and new institutionalism that all share a strong concern with time and space dynamics They are recombined into an interdisciplinary meta theoretical framework capable of articulating the overall problem of socio economic development and providing methodological anchors for comparative case study analysis while recognizing context specificities The analytical methodology focuses on key dynamics and relations such as strategic agency and collective action institutions and structures culture and discourse as well as the tension between path dependency and path shaping The methodology is then applied to eight urban and regional cases mostly from Western Europe but also from the United States and China The case studies confirm the relevance of time and space sensitive analysis not only for understanding development trajectories but also for policy making They ultimately highlight that while post war institutions were able to address systemic contradictions and foster a relatively inclusive development model the neoliberal turn has led to reductionist policies that not only have resulted in an increase in social and spatial inequalities but have also undermined growth and democracy
