Technical Communication Lil Rodman,1996 **Paralogic Rhetoric** Thomas Kent,1993 Building on the ideas of philosophers and literary theorists such as Donald Davidson Richard Rorty Jacques Derrida Jean Francois Lyotard and Mikhail Bakhtin Thomas Kent investigates in *Paralogic Rhetoric* the role that interpretation plays in the acts of writing and reading Kent argues that both writing and reading as kinds of communicative interaction constitute thoroughly hermeneutic activities that cannot be reduced to discreet conceptual frameworks or to systemic processes of one kind or another Kent calls his view of communicative interaction paralogic hermeneutics and he employs this notion to critique some of our most influential contemporary approaches to the study of writing and reading Kent develops his argument in two general stages In the first stage chapters one through four he discusses the meaning of the term paralogy and defines the concept of paralogic hermeneutics In addition he attacks in these chapters the claim endorsed by many rhetoricians and literary theorists that language conventions control the meaning of utterances and in place of the conventionalist formulation of communicative interaction Kent advocates an externalist account of meaning that attempts to move beyond the old Cartesian opposition of mind and world In stage two of his argument chapters five through seven Kent draws out some of the practical implications of a paralogic hermeneutics for the disciplines of rhetoric and literary criticism One of Kent s most provocative and important claims in these chapters concerns his assertion that the traditional disciplinary boundary existing between composition studies and literary studies evaporates once writing and reading are regarded as hermeneutic endeavors Finally *Paralogic Rhetoric* represents a frontal assault on some of the fundamental assumptions about writing and reading held by many of our most important contemporary rhetoricians and literary theorists Kent argues persuasively that the time has arrived for a reconsideration of our current conceptions concerning both the production and the reception of discourse and in these pages he proposes a description of communicative interaction that serves as a large first step toward a radical redescription of writing and reading BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Coming to Know Paul Georg Meyer,1997 *Teaching Business Writing* Jeanne W. Halpern,1983 **Business and Administrative Communication** Kitty O. Locker,1995 Divides into five parts the building blocks of effective messages letters and memos interpersonal communication reports and job hunting *Assessment in Technical and Professional Communication* Margaret Hundleby,Jo Allen,2017-07-05 This collection of essays focuses on both how and why assessment serves as a key element in the teaching and practice of technical and professional communication The collection is organized to form a dual approach on the one hand it offers a landscape view of the activities involved in assessment examining how it works at institutional program and classroom levels on the other it surveys the implications of using assessment for formulating maintaining and extending the teaching and practice of technical communication The book offers teachers

students scholars and practitioners alike evidence of the increasingly valuable role of assessment in the field as it supports and enriches our thinking and practice No other volume has addressed the demands of and the expectations for assessment in technical communication Consequently the book has two key goals The first is to be as inclusive as is feasible for its size demonstrating the global operation of assessment in the field For this reason descriptions of assessment practice lead to examinations of some key feature of the landscape captured by the term technical communication The second goal is to retain the public and cooperative approach that has characterized technical communication from the beginning To achieve this the book represents a conversation with contributors chosen from among practicing highly active technical communication teachers and scholars and the chapters set up pairs of opening statement and following response The overriding purpose of the volume therefore is to invite the whole community into the conversation about assessment in technical communication

Singular Texts/plural Authors Lisa S. Ede, Andrea A. Lunsford, 1992 Why write together the authors ask They answer that question here in the first book to combine theoretical and historical explorations with actual research on collaborative and group writing Lisa Ede and Andrea Lunsford challenge the assumption that writing is a solitary act That challenge is grounded in their own personal experience as long term collaborators and in their extensive research including a three stage study of collaborative writing supported by the Fund for the Improvement of Post Secondary Education The authors urge a fundamental change in our institutions to accommodate collaboration by radically resituating power in the classroom and by instituting rewards for collaborative work that equal rewards for single authored work They conclude with the injunction Today and in the twenty first century our data suggest writers must be able to work together They must in short be able to collaborate
