Handwriting Jean Alston, Jane Taylor, ed., 2024-11-01. First Published in 1987. Handwriting reviews theory and research on handwriting and on children who have handwriting problems and draws out principles and recommendations for practitioners. The practitioners will include teachers, educational advisors, psychologists, and occupational and physical therapists. There has been a revival in the teaching of the basic school skills of reading, writing, and number. Surprisingly, however, there are very few books concerning the manipulative skills of handwriting, and this book seeks to fill this major gap. While much of the book is concerned with the development and teaching of handwriting skills in ordinary children, it also gives detailed consideration to the problems encountered by children with physical disabilities. This is an interesting read for students of education.
