*Beyond Digital Representation* Andrea Giordano,Michele Russo,Roberta Spallone,2023-09-01 This book collects  
contributions which showcase the impact of new augmented reality AR and artificial intelligence AI technologies considered  
jointly in the fields of cultural heritage and innovative design AR is an alternative path of analysis and communication if  
applied to several fields of research in particular if related to space and artifacts in it This happens because the neural  
network development strengthens the relationship between augmented reality and artificial intelligence creating processes  
close to human thought in shorter times In the last years the AR AI expansion and the future scenarios have raised a deep  
trans disciplinary speculation The disciplines of representation drawing surveying visual communication as a convergence  
place of multidisciplinary theoretical and applicative studies related to architecture city environment tangible and intangible  
cultural heritage are called to contribute to the international debate The book chapters deal with augmented reality and  
artificial intelligence analyzing their connections as research tools for knowing the environment In particular the topics focus  
on the intersection between real and virtual world and on the heuristic role of drawing in the enhancement and management  
of cultural heritage in planning and monitoring the architecture the environment or the infrastructures Scientists involved in  
AR and AI research applied separately or together in the field of cultural heritage architectural design urban planning and  
infrastructures analysis as well as members of public and private organizations make up interdisciplinary groups that fuel the  
discussion focusing on the priorities and aims of the research related to the disciplines of representation      Art Index
