Users are aware that they need to move to networked teleproduction, and they are aware that various file formats are available, but they don't have a clear understanding of their advantages and disadvantages. Should I use Windows Media 9 or QuickTime? For example, as many versions of one movie are needed, subtitle TV or Airplane, a master file is now created with metadata controlling which features, subtitles, editing are needed. This book is the authoritative work on all professional file formats for film and television globally. Covers all major professional file formats, including the Digital Picture Exchange (DPX), General eXchange Format (GXF), Material eXchange Format (MXF), Advanced Authoring Format (AAF), QuickTime, and Windows Media, in most cases by the lead author of the format. **Handbook of Parenting** Marc H.
