Asymmetries between Language Production and Comprehension Petra Hendriks,2013-07-31 This book asserts that language is a signaling system rather than a code based in part on such research as the finding that 5 year old English and Dutch children use pronouns correctly in their own utterances but often fail to interpret these forms correctly when used by someone else Emphasizing the unique and sometimes competing demands of listener and speaker the author examines resulting asymmetries between production and comprehension The text offers examples of the interpretation of word order and pronouns by listeners and word order freezing and referential choice by speakers It is explored why the usual symmetry breaks down in children but also sometimes in adults Gathering contemporary insights from theoretical linguistic research psycholinguistic studies and computational modeling *Asymmetries between Language Production and Comprehension* presents a unified explanation of this phenomenon Through a lucid comprehensive review of acquisition studies on reference related phenomena Petra Hendriks builds a striking case for the pervasiveness of asymmetries in comprehension production In her view listeners systematically misunderstand what they hear and speakers systematically fail to prevent such misunderstandings She argues that linguistic theory should take stock of current psycholinguistic and developmental evidence on optionality and ambiguity and recognize language as a signaling system The arguments are compelling yet controversial grammar does not specify a one to one correspondence between form and meaning and the demands of the mapping task differ for listeners and speakers Her proposal is formalized within optimality theory but researchers working outside this framework will still find it of great interest In the language as code vs language as signal debate Hendriks puts the ball firmly in the other court Ana P rez Leroux University of Toronto Canada

Comprehensive Evaluations Nancy Mather, Lynne E. Jaffe, 2010-11-11 An invaluable collection of sample case reports from experts in child and adolescent assessment. With contributions from authorities in the fields of psychology and special education, including Dawn Flanagan, Elaine Fletcher-Janzen, Randy Kamphaus, Nadeen Kaufman, George McCloskey, Jack Naglieri, Cecil Reynolds, and Gale Roid, *Comprehensive Evaluations* provides over fifty sample case reports to help you draft carefully planned, goal-directed, and comprehensive evaluations that clearly explain the reasons for a student's school-related difficulties from preschool to postsecondary level. A wellspring of information for educational professionals, *Comprehensive Evaluations* provides models for writing diagnostic reports to accompany the tests most frequently administered in the evaluation of children, adolescents, and adults, including the BASC 2, KABC II, WAIS IV, WISC IV, and WJ III. The reports reflect various disciplines within psychology and education, different theoretical perspectives and paradigms, and span a broad spectrum of disabilities. The diagnostic reports found within *Comprehensive Evaluations* will help you expand your familiarity with widely used test instruments, enhance your understanding of the interpretation of test scores, improve your ability to tailor written reports to the purposes of the evaluation, translate assessment results into meaningful treatment recommendations, recognize the differences in what evaluators from various school districts, agencies, and private practices consider to be a comprehensive evaluation, appreciate how your theoretical perspective and choice of tests can influence diagnostic conclusions, determine a report writing style that meets your needs. *Comprehensive Evaluations* deftly illustrates how thorough assessments help empirically pinpoint the reasons a student is struggling in school, which then allows an evaluator to select the most appropriate accommodations and interventions to help the student succeed.

The Limits of Syntax Peter Culicover, Louise McNally, 2020-01-13 *The Limits of Syntax* is a collection of original, never before published essays. Each essay explores the ways in which greater incorporation of nonsyntactic explanations into linguistic research may deepen our understanding of problematic linguistic phenomena and

at the same time strengthen syntactic research To clarify the limits of syntactic explanation these essayists investigate four areas The first is a set of general issues related to the theory of grammar and the place of syntax in it The second set develops an explanation of the power of semantics pragmatics within a syntactic theory The third addresses the status of syntactic constraints and the fourth seeks to explain the triggering of movement in the so called Minimalist Program and its derivational approach to syntactic representations It seeks to refine the theory of syntax and encourages more adequate characterization of linguistic phenomena The original papers form a coherent presentation
