results of two studies that focus on general questions about the use of online dictionaries. It presents empirical data on contexts of dictionary use on expectations and demands regarding online dictionaries. Furthermore innovative features such as the use of multimedia elements or the option of a user adaptive interface and questions of design were assessed empirically. The third part of this volume comprises more specific studies of online dictionaries: an eye tracking study evaluating the new web design of the dictionary portal OWID and a log file study which tries to get to the bottom of the following question: Do dictionary users look up frequent words or put differently: is there a connection between how often a word is looked up and how often it appears in a corpus. In the last chapter of this thematic section the question of how users judge the combination of a written paraphrase and an additional illustration in illustrated online dictionaries is addressed. The last part focuses on the use of monolingual dictionaries in particular the German online dictionary *elexiko*. In this context two online questionnaire based studies were carried out. The empirical studies were conducted in the form of online surveys combining questionnaires and experimental elements and in the form of laboratory studies using eye tracking technology as well as using observational methods such as log file analyses. Regarding the comprehensive research framework this volume can be relevant to lexicographers, metalexicographers and linguists who are interested in the use of online dictionaries and in the development and exploration of lexicographical data for the internet as well as linguists interested in empirical methods. It addresses a broad expert audience by presenting an academic subject which is currently the focus of much discussion.

This has led to an increase in the enrollment of students with diverse linguistic backgrounds placing more academic demands on educators. Linguistic diversity presents both opportunities and challenges for educators across the educational spectrum. Language ideologies profoundly shape and constrain the use of language as a resource for learning in multilingual or linguistically diverse classrooms. While English has become the world language most communities remain and are becoming more and more multicultural, multilingual and diverse. The *Handbook of Research on Teaching in Multicultural and Multilingual Contexts* moves beyond the constraints of current language ideologies and enables the use of a wide range of resources from local semiotic repertoires. It examines the phenomenon of language use, language teaching, multiculturalism and multilingualism in different learning areas giving practitioners a voice to spotlight their efforts in order to keep their

teaching afloat in culturally and linguistically diverse situations Covering topics such as Indigenous languages multilingual deaf communities and intercultural competence this major reference work is an essential resource for educators of both K 12 and higher education pre service teachers educational psychologists linguists education administrators and policymakers government officials researchers and academicians
