Sobel,2022-09-20 An examination of children s causal reasoning capacities and how those capacities serve as the foundation of their scientific thinking Young children have remarkable capacities for causal reasoning which are

part of the foundation of their scientific thinking abilities In *Constructing Science* Deena Weisberg and David Sobel trace the ways that young children s sophisticated causal reasoning abilities combine with other cognitive metacognitive and social factors to develop into a more mature set of scientific thinking abilities Conceptualizing scientific thinking as the suite of skills that allows people to generate hypotheses solve problems and explain aspects of the world Weisberg and Sobel argue that understanding how this capacity develops can offer insights into how we can become a more scientifically literate society Investigating the development of causal reasoning and how it sets the stage for scientific thinking in the elementary school years and beyond Weisberg and Sobel outline a framework for understanding how children represent and learn causal knowledge and identify key variables that differ between causal reasoning and scientific thinking They present empirical studies suggesting ways to bridge the gap between causal reasoning and scientific thinking focusing on two factors contextualization and metacognitive thinking abilities Finally they examine children s explicit understanding of such concepts as science learning play and teaching

Teaching Psychology Douglas A. Bernstein,Sue Frantz,Stephen L.

Chew,2024-12-11 Now in its fourth edition *Teaching Psychology A Step By Step Guide* synthesizes the latest pedagogical research on effective teaching and translates it into recommendations for classroom application It explores the rapidly changing academic landscape and offers innovative ideas for teaching psychology and creating inclusive classrooms where all students can experience a sense of belongingness and psychological safety This comprehensive volume covers key topics such as planning a course choosing teaching methods that promote well being diversity and inclusion assimilating technology including Artificial Intelligence and the integration of teaching into the rest of your academic life The authors include an abundance of supportive supplementary content to guide and inform new teachers including their own real life anecdotes and examples Fully revised throughout this new edition analyses updated research on topics such as student evaluations of teaching establishing the value of your courses student motivation and trigger warnings This edition also features a completely new chapter on teaching psychology abroad and focuses on the goals of post pandemic teaching including harnessing the power of online and hybrid teaching environments Presenting a valuable and cutting edge guide for psychology teachers this book is a vital resource for those who are training psychology instructors or undertaking a teaching psychology course It is also a useful text for more experienced faculty who wish to reevaluate their current teaching practices and explore new teaching ideas and techniques
