Wright,2015-05-27 The study of history in Canada has a history of its own and its development as an academic discipline is a multifaceted one The Professionalization of History in English Canada charts the transition of the study of history from a leisurely pastime to that of a full blown academic career for university trained scholars from the mid nineteenth to the late twentieth century Donald Wright argues that professionalization was not in fact a benign process nor was it inevitable It was deliberate Within two generations historians saw the creation of a professional association the Canadian Historical Association and rise of an academic journal the Canadian Historical Review Professionalization was also gendered In an effort to raise the status of the profession and protect the academic labour market for men male historians made a concerted effort to exclude women from the academy History s professionalization is best understood as a transition from one way of organizing intellectual life to another What came before professionalization was not necessarily inferior but rather a different perspective of history As well Wright argues convincingly that professionalization inadvertently led to a popular inverse the amateur historian whose work is often more widely received and appreciated by the general public **Universal History - 1967** Eugen

Rosenstock-Huessy,1997-08 **Thomas Jefferson, Time, and History** Hannah Spahn,2011 Beginning with the famous opening to the Declaration of Independence When in the course of human events almost all of Thomas Jefferson s writings include creative stylistically and philosophically complex references to time and history Although best known for his forward looking statements envisioning future progress Jefferson was in fact deeply concerned with the problem of coming to terms with the impending loss or fragmentation of the past As Hannah Spahn shows in *Thomas Jefferson Time and History* his efforts to promote an exceptionalist interpretation of the United States as the first nation to escape from the crimes and calamities of European history were complicated both by his doubts about the outcome of the American experiment and by his skepticism about the methods and morals of eighteenth century philosophical history Spahn approaches the conundrum of Jefferson s Janus faced equally forward and backward oriented thought by discussing it less as a matter of personal contradiction and paradox than as the expression of a late Newtonian Enlightenment in a period between ancient and modern modes of explaining change in time She follows Jefferson in his creation of an influential narrative of American and global history over the course of half a century opening avenues into a temporal and historical imagination that was different from ours and offering new assessments of the solutions Jefferson and his generation found or failed to find to central moral and political problems like slavery **The Northern Ireland Conflict on the Margins of History** Kenneth Funston,Cillian McGrattan,2025-05-01 Assessing the impact of paramilitary violence on border Protestants in Northern Ireland remains a critically overlooked part of the region s history Remembered through a framework of memory that blurs the boundary between victim and perpetrator existing scholarship often disempowers border Protestants by obscuring their experience under the Provisional IRA s campaign This re examination of the conflict illuminates how the Troubles impacted the Protestant community s physical economic and cultural presence in the border counties Combining oral history with a broader assessment of the Provisional campaign this book presents a compelling case study for viewing this violence as a form of ethnic cleansing *Methods of Historical Study* Herbert Baxter Adams,1884 *The Polish Climate in the European Context: An Historical Overview* Rajmund Przybylak,Jacek Majorowicz,Rudolf Brázdil,Marek Kejan,2009-12-03 Reconstruction of the climate variability of the past 500 years is a topic of great scientific interest not only in global terms but also at regional and local levels This period is interesting on account of the increasing influence of anthropogenic forcing and its overlap with natural factors *The Polish Climate in the European Context An Historical Overview* summarises the results of research into climate variability based on a combination of instrumental documentary dendrochronological and borehole data from Poland The first part of the book provides a Central European perspective of research in these fields which forms the general background for a presentation of the state of the art of climatic change studies in Poland during the past 500 years Part 2 This is followed by a selection of papers dealing mainly with different aspects of climate variability in Poland and Central Europe Part 3 This book is a valuable tool integrating Polish Central and Eastern European climate
