**Bioengineering Liver Transplantation** Luc J.W. Van der Laan, Bart Spee, Monique M. A. Versteegen, 2019-11-19 The aim of this Special Issue is to review, understand and evaluate new and exciting opportunities from the field on regenerative medicine, biomaterials and stem cell research for the bioengineering of human liver grafts that can be applied for transplantation and personalized treatment of end stage liver disease. The development of culture conditions for long term expansion of LGR5 intestinal stem cells as crypt villus structures demonstrated the feasibility of deriving complex organ like structures in vitro from primary adult tissues including the liver. Moreover, human pluripotent stem cells (hPSCs) can be applied to generate functionally matured liver and bile duct epithelial cells. In this Special Issue we welcome reviews and original papers focussing on hepatic cell sources including adult hepatic stem cells, organoids, fetal and induced pluripotent stem cells and primary cells i.e. hepatocytes, cholangiocytes and endothelial cells and how these cells can be applied in tissue engineering strategies to generate implantable and personalized liver grafts. Potential topics include but are not limited to the following: liver tissue engineering, liver regeneration, graft repair, liver stem cells and organoids, bio scaffolds and 3D printing. We invite you to contribute original research papers as well as comprehensive reviews aligned with these themes to advance and improve the actual state of the art in liver bioengineering and providing new opportunities for the imminent medical problem of organ and tissue shortage for transplantation      **Handbook of Education Policy Research** Janelle

Scott, 2025-07-17 The second edition of the *Handbook of Education Policy Research*, the largest volume published in AERA's history, addresses a variety of policy and contextual issues in early childhood, K-12 and postsecondary education that have received extensive empirical attention during the past 15 years. With the pandemic and social turmoil as a backdrop, the editors build on the breadth and depth of the first edition while expanding the scope of the project to include subjects, methods, theories and analyses that have contributed powerfully to the study of education policy and politics in the 2010s and 2020s. The field has become more comprehensive and inclusive and the authors represent a diversity of racial, ethnic and gender identities and intellectual and disciplinary orientations. Most chapters come from multiple authors reflecting the multi-sourced development of research in education policy since the first volume was published. This compilation consists of 70 chapters and nine commentaries that map past, present and future directions of the field and richly attend to critical issues of interest to students, researchers, policy makers and practitioners      *Diarrhoeal Diseases Research*, 1992-06
