Embedded Autonomy Peter B. Evans, 2012-01-12 In recent years debate on the state's economic role has too often devolved into diatribes against intervention Peter Evans questions such simplistic views offering a new vision of why state involvement works in some cases and produces disasters in others To illustrate he looks at how state agencies local entrepreneurs and transnational corporations shaped the emergence of computer industries in Brazil India and Korea during the seventies and eighties Evans starts with the idea that states vary in the way they are organized and tied to society In some nations like Zaire the state is predatory ruthlessly extracting and providing nothing of value in return In others like Korea it is developmental promoting industrial transformation In still others like Brazil and India it is in between sometimes helping sometimes hindering Evans's years of comparative research

War on Family Property Rights Ingyu Oh,Chris Rowley,Yong Wook Jun,2022-12-26 As of 2020 South Korea has 14 firms listed on the global Fortune 500 including Samsung Hyundai SK POSCO and LG The country along with Japan is also one of the only two countries in Asia that are members of the OECD and its Development Assistance Committee DAC simultaneously Furthermore Korea boasts of its membership in the seven country 50 30 Club countries with a population of more than 50 million and a GDP of 30 000 per capita However unlike its official status as one of the most developed economies in the world it still suffers from the backward struggle between the state and the family firms over the issue of property rights and family successions The corporate governance issue has damaged the reputation of Korean chaebols family conglomerates for many decades as founders and their families had been imprisoned and or fined for violating inheritance tax laws and related laws associated with the issue of protecting their family ties The democratically elected governments in Korea since 1987 have tried to reform the chaebol governance structures to ease asset concentration by family members although many of those have failed due to corruptive practices between the state and the chaebol This book spells out the current governance problems within the chaebol state reform policies and both success and failures of the reforms It was originally published as a special issue of the Asia Pacific Business Review *Tiger Management* Martin Hemmert,2012 Throughout the last several decades Korean companies have entered the world markets in a wide range of manufacturing industries with great success How did they achieve this exceptional performance This book uncovers the

secret of their performance through a comprehensive analysis of the Korean management system. It explains to an international audience how it has developed, why it works so well, and what non-Koreans can learn from it. The book analyzes the management of Korean firms from three different perspectives. First, a historical perspective is applied by showing how Tiger Management has emerged and how it has been continuously advanced over the last 50 years. The breathtaking stories of how Korean companies seemingly coming from nowhere have challenged their Western and Japanese competitors on the world markets are told. Second, the cornerstones of Tiger Management are analyzed from a functional viewpoint, showing that the success of Korean companies rests on a smart combination of business strategy, leadership, and human resource management practices. Finally, the present and future of Tiger Management is discussed by showing how Korean companies have adapted to changes in their business environment at home and abroad, and what non-Korean companies can learn from their Korean rivals. The book gives an up-to-date analysis of Korean management practices from a global perspective. It identifies the success factors of Korean companies: long-term aggressive and persisting business planning, speed, flexibility, strong leadership, strong teamwork, and high investment into human skills and capabilities. It illustrates how these management practices complement each other and provides non-Korean companies with signposts on how they can adopt them.
